

AWAIT COOLIDGE'S COAL ACTION

CITY DECIDES ON CLEANING RESERVOIRS

Preparations For Job Started This Afternoon, Announced by City Engineer

JOB TO BE RUSHED

Water Situation Bad, Danger of Typhoid Epidemic Is Seen by Bacteriologist

Reservoirs of the water plant will be cleaned, it was announced shortly before noon today by City Engineer T. R. Atkinson. The city commission, it was stated, had decided to clean the reservoirs and bear the expense.

The work will be started tomorrow morning, this afternoon being devoted to preparations for the job.

Water consumers are asked not to use water for sprinkling lawns from tonight until further notice, probably two days, Mr. Atkinson said. It is held necessary to decrease the consumption in order to permit speedy cleaning.

Just how long the cleaning will take is uncertain, but it is the intention of the city officials, it was said, to rush the job as much as possible. An active life early yesterday has been growing more critical daily for the last two weeks, with additional reports of wide-spread sickness being made.

E. M. Stanton, state health laboratory bacteriologist, said this morning that there was danger of a typhoid fever epidemic as a result of the condition of the water.

The water, he further declared, is far below the standards required by state health standards and the United States Public Health Service. While during the last five years, he said, except for brief periods, the water had been kept within the standard by use of chemicals, it is not now within the standards and is a menace to public health.

The condition of the water, which has grown steadily worse for two or three weeks, according to authorities, is now at about the worst stage it could possibly be.

Today's Developments
Developments in the situation earlier included:

E. M. Stanton informedly conferred at the Attorney-General's office on powers of the health authorities, and planned to make request for a formal opinion today through the city attorney.

Superintendent of the company denied the statement made by C. L. Hanson before the commission Monday night that chlorine is not being put in the water. Mr. Stanton said the chemicals were being put in daily.

Some local citizens have discussed bringing damage suits against officers of the water company for damages to their health, that of their families and to ask damages because of expense involved.

The water company, according to one employee, asserts that the plant belongs to the city and that in the contract for sale it was provided that title passed to the city June 9 and possession passed when the city paid over \$265,000.

A representative of the bonding companies which purchased city bonds and warrants was expected in the city today for a conference with members of the city commission, the purpose of which was not known.

Bacteriologist C. L. Hanson

Mr. Stanton, asked by The Tribune what examinations of the water had showed, said that the analysis reveals an exceedingly high bacterial count, that the *Escherichia coli* far exceeds the limit set by state and federal health standards, that it may produce typhoid fever, that the high turbidity and the amount of color and other bacteria produce severe intestinal trouble.

In addition to the bad condition of the water there is stagnant mud in the reservoirs which is an additional breeding-place for bacteria. There is so much fine sand and stagnant mud that chemicals can not remove all of the bacteria, he said.

"The condition of the water is the worst since I have been here in five years," he said. "Most of the time the water has been within the standard with respect to bacteria, except during temporary high water for failure to clean reservoirs. The company has been cleaning reservoirs once or twice a year, but in the last year has made no attempt to clean them."

"It looks to me as if there is a criminal indifference to the health of the people of the city."

Bolling Order Issued

Mr. Stanton said he had been informed by one attorney that there probably was nothing the health board could do. He went to the Attorney-General's office and discussed the matter with Charles Simon, special assistant attorney-general. He expressed the opinion that the health authorities could act but said request for formal opinion would have to come through the regular channels and he wouldn't give a positive opinion without investigation.

"I should think," said Mr. Simon to The Tribune, "that if there is a menace to public health existing the board of health could act."

GAS TO DECIDE FUTURE WARS, SAYS EXPERT

May Put Whole Armies to Sleep 25 Years Hence

New York, Aug. 22.—Whole armies put to sleep and taken prisoner in gas warfare is by no means an impossibility 25 years hence, Col. Raymond F. Bacon, chief of the Technical Division of the Chemical Warfare Service, A. E. F., says in a description of the possibilities of the future of war made public by the American Chemical Society.

The research organization did more toward winning the war, Col. Bacon asserts, than any other \$200,000,000 spent in other ways. One of the greatest lessons of the war has so far gone almost unheeded, according to Col. Bacon, who continues:

"To say the use of gas in warfare must be abolished is almost the same as saying that no progress must be made in the art of warfare toward making it more efficient or more humane. If one reads of the great battles of history, one will find that the victorious general conquered his enemy usually because of the fact that he so chose his position as to have his flank protected by river, mountain range or some naturally strong barrier.

"Much of the strategy of these battles consisted in maneuvering so as to obtain the advantage of position. With the use of gas it is possible to saturate a piece of ground so that no troops can cross it, and thus make an artificial barrier for the flank or protect the lines of communication. Moreover, these artificial barriers can be kept barriers for just as short a time as the strategy of the particular battle demands. There are but hints, but show the tremendous unexploited possibilities of gas in warfare."

The water company, according to one employee, asserts that the plant belongs to the city and that in the contract for sale it was provided that title passed to the city June 9 and possession passed when the city paid over \$265,000.

A representative of the bonding companies which purchased city bonds and warrants was expected in the city today for a conference with members of the city commission, the purpose of which was not known.

RAILROAD WINS DAMAGE SUIT

The supreme court has again decided the cases of Edmund Dubs and Rudolph Dubs, which have been in the courts for years, in favor of the Northern Pacific Railway company, which was sued by Edmund Dubs as the injured party and Rudolph Dubs as the guardian.

Edmund Dubs, in July, 1912, when nine years old, curled up to sleep on the railroad track near New Leipzig with his pet dog, according to the record. The engineer said the dog obstructed his view of the boy whom he did not see in time to halt the train. The boy lost an arm and a leg.

The court held there was no negligence on the part of the railroad company. The case came up from Grant county.

VALIDITY OF MINE 8-HOUR LAW ATTACKED

Trux Coal Company Brings Action in the Federal Court

Suit attacking the constitutional provision of the eight-hour law was filed recently in the federal court, western division, for trial at Minot by McGee and Goss, Minot attorneys, according to information here. The state, the mine inspectors and states attorney of Burke county were made defendants by the Trux Coal Company of Columbus, N. D.

The coal company alleged that it would be injured and deprived of its constitutional rights if section 88, by its terms prohibits plaintiff from permitting its laborers to work under contract or otherwise over eight hours per day in open pit mining under the conditions aforesaid, and is an unlawful and illegal and unconstitutional abridgement and denial of its privileges, rights and immunities as a citizen of the United States."

It also alleged the section violated the due process clause of the federal constitution.

LOAN BUSINESS GROWS.
Williston, N. D., Aug. 22.—Business of the Williston Savings and Loan association has grown rapidly since it was organized in May, 1914, according to N. B. Ludwigs, secretary. He states that the association's holdings are now past the \$100,000 mark, as compared with \$3,725 in 1918. His latest report shows \$86,150 invested in first mortgage loans on improved Williston property \$6,286 in tax certificates and \$7,130 on deposit, with \$8,771 unpaid balances on pending loans.

FROST FAILS TO NIP CROPS IN STATE THOUGH MERCURY IS LOW

It didn't frost in North Dakota last night. And the little cool spell we've had is nothing to worry about.

Because, according to O. W. Roberts, weather observer, the records show that there is a cool, fall-like spell in every August, and it usually follows by three or four weeks of nice, warm weather.

Also, the prediction is for warmer weather tonight, not only in Bismarck and vicinity but in all of North Dakota.

The state food and drug commission's office had had a man in Bismarck recently to ask public opinion.

PLANES FIGHT BAD WEATHER IN WYOMING

Make Good Record in Trans-Continental Air Mail Test Despite Conditions

CLOSE TO SCHEDULE

Unusual Weather Near Laramie Only Obstacle in the Night's Flight

Chicago, Aug. 22.—(By the A. P.)—The night-flying experiment of the postal service in a test of 25-hour service from coast to coast proved successful except for unique weather conditions at Laramie which held one airman fog-bound.

Daylight today found the west-bound relay moving westward almost on schedule time with perfect relays at each point. The east-bound mail made a gap of 50 miles between Cheyenne and Laramie when heavy clouds made advance impossible. Three times the pilot tried to skip the low-hanging fog and each time he could not discern his direction.

Pilot H. D. Boonstra left Cheyenne at 5 o'clock Mountain time, west bound 40 minutes behind schedule.

Pilot Jack Knight arrived at 2:50 a. m. Mountain time, 1 hour and 25 minutes ahead of schedule but due to bad weather the relay pilot awaited dawn.

Pilot H. C. Lewis left Omaha 25 minutes late. Pilot Collison, who had to find his way out of Laramie last night because of the fog, resumed his eastern flight at 5:21 a. m. mountain time but the Cheyenne relay after waiting two hours for his cargo waited for him.

Boonstra carrying the west-bound mail in the maiden trip of the 28-hour trans-continental mail service returned to Cheyenne early today at 5 o'clock and getting out six miles. The fog was so dense that he was unable to penetrate it with safety.

Boonstra carrying the west-bound mail in the maiden trip of the 28-hour trans-continental mail service returned to Cheyenne early today at 5 o'clock and getting out six miles. The fog was so dense that he was unable to penetrate it with safety.

GERMAN BANK HEAD STAYS

Resignation of Rudolph Havestine Officially Denied

(By the Associated Press)

Berlin, Aug. 22.—The report that Rudolph Havestine, president of the Reichsbank, has resigned is entirely without foundation, it was semi-officially stated today.

Dispatches from Berlin Tuesday night carried reports of Havestine's resignation, either submitted or pending. The United Socialists have been demanding his retirement on the ground that he and his fellow directors failed in instituting financial reforms which had prevented the collapse of the mark.

TAKE OVER RUSSIAN LAND.
Berlin, Aug. 22.—Another agricultural concession has been taken in Russia by a German organization called the German-Russian Seed Growing Company, which will establish an experimental farm on a tract of about 30,000 acres near Moscow. This is similar to the Krupp agricultural concession in the Ukraine.

Other German interests soon will take over wood concession covering 200,000 acres of forest near Myrybin, Samovol, will be erected and cellulose factories operated.

STATE ENTERS THE M'KENZIE WILL PROBATE

Will Claim That Legal Residence of Deceased Political Leader was in Bismarck

INHERITANCE TAX NUB

Value of Property in County Estimated at Something Over Ten Thousand

BANKERS IN MINOT CONFAB

Minot, N. D., Aug. 22.—Members of the development committee of the northwest group of the North Dakota Bankers' association will gather in Minot today for a conference relative to further work along development lines. Through action taken at the last meeting of the northwest group in Minot, a fund was subscribed for development purposes in northwestern North Dakota. The committee's personnel is: Bertie Nelson, Flaxton, ex officio member in his capacity as president of the northwest group; R. H. Farmer, Flaxton; C. J. Krogoff, Granville; Hans Miller, Ryder; Ernest Bylin, Tioga; and Henry Byrum, and Burleigh county.

Gordon V. Cox, appearing for the tax commissioner's office, asked delay in the hearing until tomorrow when the tax commissioner's office will, he said, file a bill in the case. Mr. Converse said this will be to the effect of proving Mr. McKenzie's legal residence in this city for the purpose of raising the question of the inheritance tax.

Property owned by Mr. McKenzie in Burleigh county, consisting of real estate, exceeds in value \$10,000, according to the petition presented to the court by Alfred Zuger and B. F. Tillotson, attorneys for George P. Flannery of St. Paul, administrator of the estate. The assessed value of the property was shown to be \$7,965.

Of the property only the McKenzie residence in Bismarck, renting for \$65 per month, produced revenue, according to T. H. Pool and Peter Wilcox, Sr., witnesses placed on the stand by Mr. Zuger and Mr. Tillotson.

The property included either complete or half ownership in various tracts of land, of which Mr. McKenzie's interest was 300 acres. Much of this, Mr. Wilcox said, was grass land south of McKenzie which produced no revenue. In addition to the house in Bismarck he had six lots in Cohn's addition assessed at \$23 each, which produced no revenue, it was stated.

Mr. Pool testified from knowledge of having taken care of Mr. McKenzie's income tax and Mr. Wilcox's income tax and Mr. Wilcox was testifying of his great admiration for Mr. McKenzie in North Dakota.

Mr. Pool said he believed there was no other individual property of Mr. McKenzie in North Dakota.

GAS PROBE TO BE DISCUSSED

St. Paul, Minn., Aug. 22.—"Ways and means for a sweeping nation-wide investigation into the question of gasoline prices" will be discussed by the national association of attorney generals at its convention in Minneapolis next week, it was officially announced today.

Clyde Young was induced to render it as a solo.

The chairman, Henry Duemeland, called on Roy Bonham to tell of his recent visit to the Fargo Rotary club while Bob Simpson gave an interesting report of last week's Rotary meeting at Mandan, which he attended and where former District Governor Norman Black was an honored guest as the special representative of various eastern Rotarians who while en route home from the Yellowstone Park had been entertained at the Mandan Round-Up. Phil Meyer was called upon to tell of his activities during his recent somewhat prolonged absence from Bismarck and related his visits at both Fargo and Grand Forks clubs. No doubt as a result of his vacation Phil appeared to exhibit a more than usual exuberance and endeavored to bring about a recall election on President Hammond.

The premier's reply pointed to the note of the Hague and the French position as to the responsibility of the Ruhr.

France holds that the question of the settlement of inter-allied war debts should await final payment of fifty billion gold marks reparation comprised in the A and B bonds.

SUMMARY OF NOTE

Paris, Aug. 22.—Official opinion of the Allies' reply set forth in the summary in England given out today in the foreign office is that the note contains elements of a practical solution of the reparations problem but a careful reading of the communication shows that in the opinion of Monsieur Poincaré the only practical solution if for Great Britain is to accept the French thesis in every detail.

The premier's reply pointed to the note of the Hague and the French position as to the responsibility of the Ruhr.

France has never repudiated the debts that she incurred during the war either to England or to America.

The French position according to the note remains unchanged.

Premier Poincaré said that the priority of reparations over other war debts was recognized.

History

FINE DISPLAYS

About 1,500 Indians on the Standing Rock reservation are planning to make their twelfth annual fair at Fort Yates, Aug. 29, 30, 31 the finest and biggest in their history.

From year to year the Indians proudly make collections and prepare for their fair of the next year. This interest in the success of the affair may be due to the fact that about half of the Indians take part in the races, broncho busting, pageantry, and dances that are important features of the occasion. The old Indians direct the pageantry and dancing, for it is portrayed the history of the tribes and individuals while the younger generation prepares the displays of grain and other farm products which they raise from year to year.

The fair grounds this year are designed by the huge circle of tents which surround the buildings containing the individual displays. In centrally located places are the old styles Indian tents bearing pictures of the history of the tribes. This gives the fair a conspicuous and distinctive character that only an Indian fair possesses.

Horse and pony races will be important features of the celebration: the awarding of prizes for grain and live stock will occupy an important place, but to the person who loves to see a nation unfold its past, the Indian dances, four different ones each evening, in which the best dancers are given prizes and the old Indian games, will probably hold forth the greatest invitation. In the dances the individuals dance separately—each portraying his own history, his own deed, and symbolizing the significance of the name which he bears. There is much individuality in the dances, for no two are alike and yet all have the characteristic Indian style.

Supplying music for the dance will be the tom-tom players who must be experts to really produce music on their drum-like instruments. There will be singing of old Indian songs and the playing of Indian games—shippey, moccasin, and others—contests, and feats of strength.

The bead work and the porcupine work done by the women and the sewing of the school girls are all unusually fine. Many people come long distances to see the bead work, for it is rapidly becoming one of the lost arts with the younger generation. Much of the value of the old dances and singing goes due to the fact that it is the old Indians who direct it as they remember it from their own parents and themselves took part in it during the early days. Only a few of the Indians who were with Sitting Bull at the Custer Massacre are now alive.

Thomas Frost is president of the Fair association, and Ben White, secretary, with a large staff of assistants.

Charges At Minot Tourist Camp May Be Eliminated

Minot, Aug. 21.—Action to eliminate charges at the Minot tourist camp, now levied if visitors remain in the camp for more than 24 hours, probably will be taken at a meeting of the Minot park board.

The opinion was freely expressed at the meeting yesterday that camping charges should be removed, at least for the remainder of this season, inasmuch as the camp has been widely advertised as a "free tourists' camp."

No charge is made at present for tourists who remain in the camp for only one night, but the charge system was adopted when it was discovered that many persons were taking advantage of the camp and its numerous facilities, while working or canvassing the city for individual purposes.

The present price schedule in the camp applies only to automobiles and not to the number of persons in each machine. It follows:

First 24 hours, free.

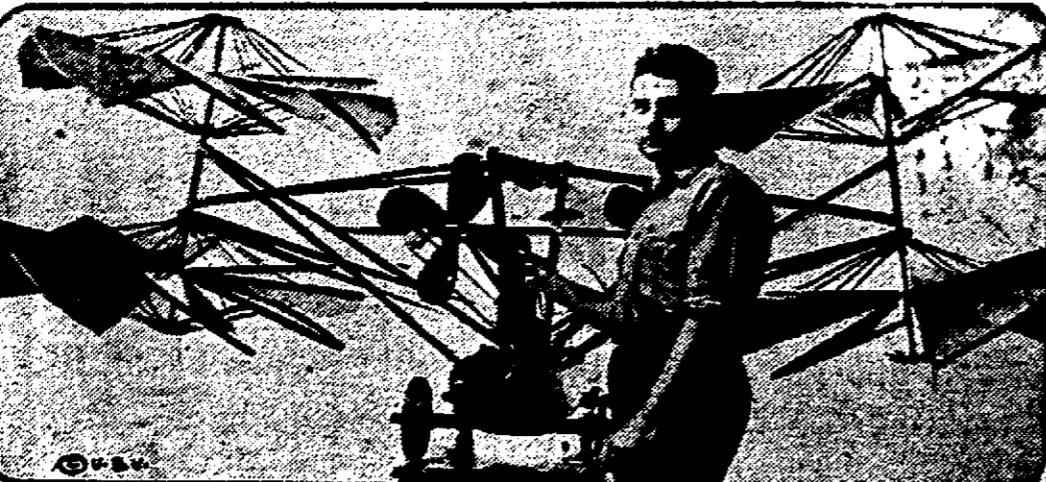

Each 24 hours after the first, 50 cents for each car.

Reports Show City Babies Have Best Chance

Chicago, Aug. 21.—Some urban communities, in spite of the crowds, are healthier places for babies than many rural districts, according to the Infant Welfare Society of Chicago. A study of the mortality charts for cities and for the country shows that babies born in crowded cities have a better start in life than children in the country, the society reports. "This of course is not because of the crowds, but in spite of them," says the report, "and is a condition made possible through the education of the mothers even before the babies are born."

"It is owing to the fact that we find organizations such as the Infant Welfare Society fighting a battle against ignorance, which has cost a heavy toll in infant lives in cities such as Chicago, and that we find health departments carrying on the work of instruction, that in spite of tenements, crowds and hot waves, through education, lives are being saved each year. We must replace the old idea that the country is a healthier place with the idea that education may make almost any community a healthy place."

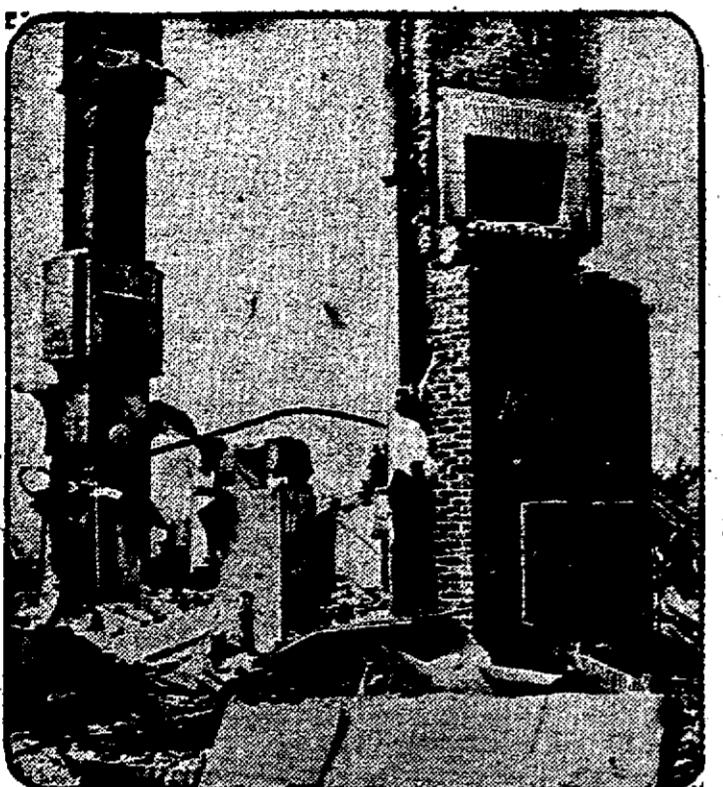

NOTICE!
Continue boiling city water.
City Health Officer.

NOT A NEW IDEA—IT WAS PLANNED IN 1843

Paul Garber, of the U. S. National Museum in Washington, D. C., has just completed this model of a helicopter from plans drawn by Sir George Cayley in 1843. It is very similar to helicopters completed recently in Europe and America.

MARK TWAIN LANDMARK DESTROYED

Two flame-scarred chimneys are all that remains of Stormfield, the home of Mark Twain in the closing years of his life. It stood on a ridge at Redding Conn.

Prospects For Large Enrollment At Normal School

Valley City, Aug. 21.—The prospects for large enrollment for the coming year at the Normal school are very good. All dormitory rooms have been reserved for the Fall Quarter and the inquiries that are coming in for catalogs and information of the College point to a large attendance.

One year ago the requirements for admission were four high school units but this year one must have ten high school units or the equivalent in order to be admitted.

Another plan which will be started this fall quarter is that of extending the scope of the Training School. Last year the Training School consisted of Kindergarten, six elementary grades, and a junior high school—the seventh, eighth, and ninth grades. With the opening of the quarter on September 25 a tenth grade will be added and it is the plan to add an eleventh grade one year from now, and in the fall of 1925 it is planned to have a complete high school.

**AGED MAN ALMOST
BEATEN TO DEATH**
Carpio, Aug. 21.—A. O. Hayden, a prosperous farmer, age 75, was nearly beaten to death by two masked men who visited his home a week ago Friday, and demanded that he tell them where he had secreted his money, which was said to be hidden in large sums about the house. After beating him to unconsciousness, the men searched the house, but found only a small sum, hidden in a stove.

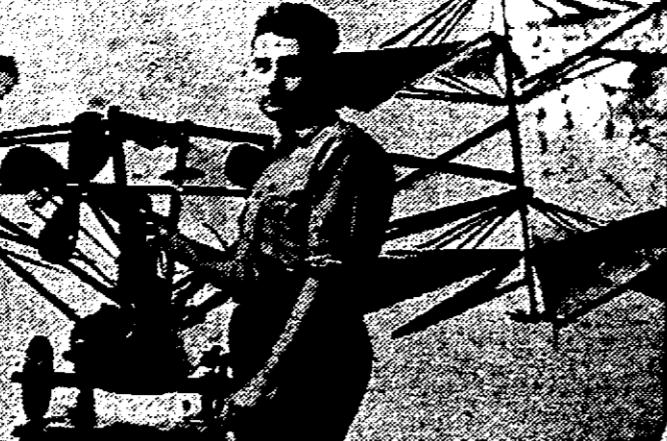

The aged man was found the following day by a neighbor woman who summoned assistance, and Mr. Hayden was taken to a Minot hospital, where it is believed he will recover. He claims he recognized the voice of one of the bandits.

HIKERS VISIT IN KILLDEER
Killdeer, Aug. 21.—Misses Florence Burns and Anna Kotlan, of Minneapolis, Minn., were visiting here with Mrs. Henry Stein last week. They had hiked to Yellowstone park, and were on their return to their homes. In Minnesota and North Dakota, they said, the tourists were generous in offering them rides but in Montana, few people asked them to ride. They explained however, that this was probably due to the fact that placards are posted at intervals along the Montana highways, warning tourists against picking up people on the roads on account of the numerous hold-ups.

PLEADS NOT GUILTY
Fargo, Aug. 21.—But LeCompte, young Sioux Indian of the Standing Rock reservation, North Dakota, recently returned from South Dakota on a removal order, pleaded not guilty to introduction and sale of liquor on the reservation when he appeared before Judge Miller in federal court today. His bond to assure appearance for trial, was set at \$500 and he is back in county jail while attempts are being made to secure this sum.

MANN'S TOWN
Glamorganshire, England, Aug. 21.—This mining district has more men than women, statistics show. For the whole of England and Wales the proportion is 1,095 females to 1,000 males. Here it is 984 females to 1,000 males.

NOT A NEW IDEA—IT WAS PLANNED IN 1843

ENVOYS LAY MEXICAN PLAN BEFORE HUGHES

Belief Expressed That Agree-
ment with Southern Na-
tion Is Near Completion

Washington, Aug. 21.—A plan designed as the ground work of a new structure of friendship and amity between the United States and Mexico was laid formally before the American government upon the return to Washington of the two commissioners appointed by President Harding to negotiate a rapprochement with the government of General Obregon.

Details of the plan as worked out by Charles B. Warren and John H. Payne with their Mexican colleagues on the international commission, will not be revealed for the present nor will responsible officials make any prediction as to the future course of the Washington administration until there has been a careful study of the entire project. Nevertheless, the steps already taken have aroused in official circles an apparent feeling of confidence that the long-continued breach between the two republics of the North American continent may be closed at last.

Report To Hughes

Mr. Warren and Mr. Payne called on Secretary Hughes immediately after their arrival from Mexico City and left on his desk their report of the negotiations and of the agreement reached between the American and Mexican commissioners for settlement of the many international claims which have accumulated since relations between the two capitals were broken. Later the commissioners were presented by Mr. Hughes to President Coolidge. They will remain in Washington for the present to confer at the state department and the White House over details of the Mexico City agreement and to give their advice as to the acceptance of the settlement plan by the United States.

**PIONEER IN
FARGO DEAD**

Served in Legislature and
Was Active Politically

Fargo, Aug. 21.—Evan S. Tyler, resident of Fargo and North Dakota for the past 52 years, died yesterday morning at his room in the Metropolitan hotel. Mr. Tyler, one of the best known of the early pioneers, came here in territorial days, in 1873. He was a veteran of the Civil War, was born in Pennsylvania, and traveled extensively before coming to Fargo.

Mr. Tyler was one of the most prominent businessmen in the state. He was associated with the late N. K. Hubbard in the E. S. Tyler company, general merchandise, in Fargo from 1874 to 1882. In 1875 he and Mr. Hubbard built the old Headwaters hotel, which stood about where the Union Light Heat and Power company's plant now stands.

Mr. Tyler was a member of the first board of directors of the First National bank of Fargo, the oldest national bank in North Dakota. He was also active politically, serving two terms in the state legislature. His first term was in 1882-1890 and the second in 1895-1896. He almost became the first governor of North Dakota, losing the nomination to John Miller, who was elected, by only two or three votes. He was a state bank examiner for several years and for six or seven years was a national bank examiner, declined to have been one of the best.

**STEAMER HITS
ROCKS; HELP
IS SENT HER**

(By the Associated Press.)

Manila, Aug. 21.—The eastern Orient liner Pangach, British, carrying passengers and freight from Australia to Manila, have gone on the rocks near the Pawi Pawi islands in the Philippines according to radio advices here. The ship's condition is not known, but it is not believed to be dangerous. A salvage vessel was sent to her aid.

FIRE DAMAGES BAKERY

Harvey, N. D., Aug. 21.—One of the landmarks of Harvey, the building occupied by the Golden Crust Bakery, was damaged by fire here recently. The loss was partly covered by insurance and the ransackable old building will be replaced by a modern one.

**N. G. COMPANIES
ARE RETURNED**

Springfield, Ill., Aug. 21.—Three companies of Illinois National Guard on strike duty at Gaylord Springs were ordered back to their homes today by Adjutant-General Carlos Black. The troops have been on duty at the American Zinc company since August 11.

**FLAGSHIP OF
FLEET ASHORE**

Seattle, Wash., Aug. 21.—The cruiser Seattle, flagship of the United States battleship fleet, went ashore on Morrowstone Point, Puget Sound, in a dense fog early today, according to a radio message today. The cruiser was not believed to be in any danger and it was expected she would be floated at high tide today.

A. O. U. W. CHAPTER ORGANIZED

Harvey, Aug. 21.—A chapter of the Ancient Order of United Workmen was organized here last week by a group of district officers. Twenty members of the Fessenden lodge assisted at the ceremonies, and a charter class of 51 members was obligated.

Officers chosen were: Roy Welch, P. M. W.; C. A. Revell, M. W.; F. C. Nied, Foreman; H. B. Havens, Recorder; E. H. Heigerud, Financier; J. H. O'Brien, Guide; James English, Inside Watch; Carl Neuhauer, Outside Watch; J. A. Fredericks, C. L. Henderson and A. L. Leer, Trustees.

NEW FRENCH ROADS

Paris, Aug. 21.—Provision for tarring and covering France's national and secondary highways with asphalt treatment probably will be made by Parliament soon. The work, expected to cost \$100,000,000, is expected to take eight years.

Bee stings are an excellent cure for rheumatism.

RED FLAG FLIES AT DOCKS

The red L. W. W. flag flying at the Marine Transport Workers Union headquarters at Hoboken, N. J., opposite the United States pier. Citizens of Hoboken are protesting against the flag since it is flown without the Stars and Stripes alongside it, the usual courtesy.

BRING RARE SPECIMEN TO UNITED STATES

Exhibit Two Animals Never Before Seen in U. S. at Museum

Chicago, Aug. 21.—Two animals never before seen in the United States are new additions to the Field Museum family, brought here by Edmund Heller, who has returned from a year spent in the uncharted jungles of Peru and the upper reaches of the Amazon's tributaries. Mr. Heller traveled through thousands of miles of country inhabited by savage and hostile tribes in his search for strange specimens for the museum.

The two new prizes, according to scientists, are the dinomys, which he brought back alive and presented to the Lincoln Park Zoo, and the cavydora. The dinomys is a rodent something like a woodchuck, which since its capture has become domesticated like a dog, according to Mr. Heller. The species is said to be nearly extinct, because it moves so slowly that its more powerful enemies can overtake it. It lives in communities, and its principal protection, the cavydora, a large rodent, is somewhat like the beaver, but larger. This animal is almost as rare as the dinomys, he said, and even the native see them but seldom. There are still many animals in the jungles of South America that never have been seen by scientists. He brought back with him 1,900 specimens to be mounted by the museum, including jaguars, tapirs, armadillos, anteaters and 10 kinds of monkeys.

Along the route of travel through the jungle, the scientist said, are many savage tribes or fugitives from justice in more civilized lands who live without law in a semi-starved and half-sick condition. Virtually all these primitive peoples have some ailment, and they plead with the white man for quinine and other medicines. Medical missionaries and schools are unknown, he said.

Mrs. Heller accompanied her husband on the trip. She superintended the cooking and the nursing of the sick, as she herself is an expert bacteriologist.

Mr. Heller has spent many years of his life in the interior of South America and Africa. When Colonel Roosevelt made his African hunting trip, the scientist went with him to prepare the specimens taken for the Smithsonian Institution.

BANDITS LOOT MAIL TRAIN

(By the Associated Press.)

Oklahoma City, Aug. 21.—Five masked men looted the mail and express cars of the Missouri, Kansas and Texas passenger train No. 123, near Okemah, Okla., shortly after midnight last night and escaped with about twenty registered packages after overpowering members of the train crew. No estimate of the loot was available today.

Posse directed by the sheriff of Osage county were combing the country roads around Okemah in search of the bandits who fled in motor cars which accomplices had waiting for them. In all it is believed the band numbered a dozen, although only five participated in the robbery. Passengers were not molested.

What the World Is Doing

CAS SEEN BY POPULAR MECHANICS MAGAZINE

Racing Auto Takes Gas and Oil "On the Run"

While racing along at a speed of nearly 50 miles an hour to break a record, an automobile recently was supplied with gas, oil, water, and relief drivers without stopping the car during a 3,155-mile run made in 50 hours 21 minutes. Although three stops were made for tires during this time, the engine was kept going without pause.

All the other supplies were taken aboard, without stopping the machine, from another car which ran alongside during the period of delivery.

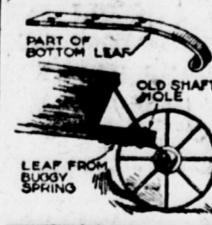

Radio Speeds Up Taking of Moving Pictures

Radio carried orders of the movie director to 5,000 members of the cast in a big scene in a western studio, recently. Where, usually, the megaphone is used to shout instructions, while camera men are turning the cranks, this director, standing at a point from which he had a clear view of all the actors, spoke his orders calmly into a sending instrument, which made it heard clearly all over the lot. The directing, somewhat difficult because of the number of people employed, was simplified by use of radio, and the movie man predicted that it will be repeated in other big scenes. The same system was used to increase the carrying power of broadcast messages and concerts at the receiving end. Use of radio in this

case not only spared the director's voice, but it produced better results by making it possible for all the actors quickly to go through with the scenes without frequent stops.

Make Poison-Gas Test in Three Minutes

Simple tests to find the degree of poisoning from a gas known as carbon monoxide are now possible with the invention of an instrument that shows how much a person has been affected within three minutes, where formerly it took from 24 to 48 hours before this could be accurately determined. The apparatus may be carried in the pocket and is expected to prove of particular value in mines, where this gas is a much-dreaded menace. Because of the compactness of the new instrument and the fact that it can be applied to a patient by one who has had no special training, it will be of broad general service, it is predicted. Government experts, who tried it on a young girl, assert that it is the quickest method known to detect the gas.

The shocks suffered when pushing a wheelbarrow over rough ground can be largely eliminated by providing the wheel with shock absorbers made from buggy-spring leaves.

The leaves used for this purpose have eyes at the ends; each is cut to a length of about 8 in., and has three or four screw holes drilled through it.

The eyes are reamed out so that they will accommodate the axle of the wheel and allow it to turn easily, and the springs are screwed to the underside of the wheelbarrow frame, the eyes being turned down.

Secure Latch for Paddocks

It is desirable to have the gates of stables and paddocks provided with a latch that cannot be opened by the horses. A good latch, that is absolutely secure, and has been found to be very useful on the stallion paddock at the University of Illinois, is shown in the drawing. The gate is made so that it touches the gatepost at the bottom first, and the top must be sprung in order to hook the latch. There is not a chance for the gate to open when the latch is in position; the harder the stallion rubs or pushes against the gate, the tighter the latch becomes.

Beeswax makes a better lubricant for tail centers than the usual white lead, oil, or grease.

Tennis Court in Squares to Teach Accuracy

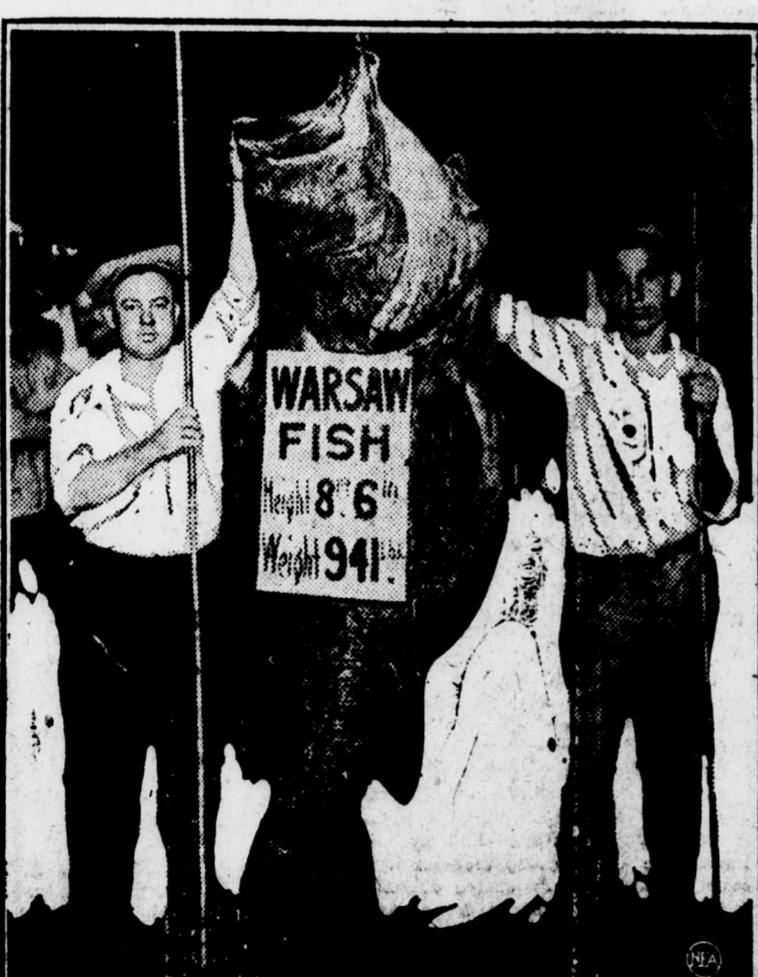

Looking like a great checkerboard, except that each square has a number, a tennis court has been devised to teach accuracy. While an instructor calls out the numbers, the player is required to place the ball in the required section. The practice provides training not only for the hands and feet, but also for the mind, because of the quickness with which the numbers are called.

FANNIE BRICE WANTS NEW NOSE

Fannie Brice, noted comedienne and wife of the famous Nicky Arnstein, has decided that she wants to have her nose changed. Dr. Henry J. Schireson, plastic surgeon of Chicago, went to Atlantic City to change the nose from Roman to Grecian. Here he and nurses are preparing Fannie for the operation.

BOY, PAGE IZAAK WALTON!

The gentleman in the center lived before his demise in the salty waters of the Gulf of Mexico. He is a Warsaw fish, and resembles a black bass in almost every detail. Note his height 7 1/2 weight on the card. Fred Gerstner (left) and Edward Mullen (right), both of New Orleans, caught the fish.

FORD CAR STOLEN.

Marmarth, N. D., Aug. 22.—For the first time during the summer, M. C. Newstrom, manager of the Rochdale Cooperative Co., placed his Ford car in a garage last Sunday night, only to discover in the morning that it had been stolen. The same night thieves broke into the Palace Meat Market, rifled the till, securing \$20, and evidence that burglars had entered the Kelly Garage was also found the next morning.

The afternoon gown is at present distinguished by the treatment of its sleeves. These are long and flowing, some caught at the wrist, some slashed, others left to drift. Evening and dinner gowns are sleeveless.

SILHOUETTE.

For tailored suits and sports costumes the silhouette for the coming season is to be as straight as it has been in past seasons with the exception of their increased tendency to introduce the circular flounce or the ripple side.

Girls Stop When They Realize How They Look, Says Teacher

GIRLS STOP WHEN THEY

By NEA Service

San Diego, Calif., Aug. 22.—The next time Mary Ellen starts out for the country club dance, tell her how pretty she looks and that she's going to be the most graceful dancer on the city. It's been 30 years since Hulda Hanker of this city. It's been 30 years since Hulda Hanker started telling young people the why and wherefore of the heel and toe. And in all those 30 years she's never encountered a young person who insisted on going to extremes in dancing.

Boys, Too.

"And I have never known a girl, once she realized it was possible to express beauty in her dancing, who didn't want to express that beauty all the while."

"It is the same with boys. Boys won't admit it, but they're vainer than girls. Get a boy to thinking about his hair, his shoes, his finger nails. Praise him for his walk, and admire the way he carries his shoulders, and he'll never fall into the slinking ways of the dance hall lizard."

"There is hardly any other question of behavior on the dance floor that will not resolve itself purely into a matter of taste. Give the young people judgment and a sense of personal pride and the jazz craze will lose every one of its objectionable features."

HULDA HANKER

WORLD'S ONLY GAMBLING SCHOOL

A German gambling casino has been opened at the summer place at Zopper and to secure managers and croupiers for the tables a school for gambling has been opened. Here some of the pupils are being shown the ins and outs of six-handed baccarat.

QUOTATIONS UP ABROAD

Liverpool Quotations Influence Chicago Market

Chicago, Aug. 22.—Higher quotations at Liverpool gave strength to

quotations on this side of the Atlantic during the early dealings. Offerings increased and an early advance was checked. Predicted frost for most parts of Canada failed to be realized and fair and warmer weather is expected in the domestic wheat region. There was some scattered commission house buying on both sides of the market but trading was light. Opening prices which ranged

from unchanged figures to 8.8 cents higher with Dec. \$1.04 5-8 to \$1.04 3-4 and May \$1.10 1-8 to 1.10 1-4 were followed by a little further rise and then a decline to a trifle below yesterday's finish.

Operating a switchboard in a busy telephone exchange is so great a strain that few girls can stand it for as long as eight years.

The BISMARCK BISMARK College and The BISMARCK BISMARK College

Roberts and Second Street North, Fargo, N. Dak.

Consolidated, will hereafter be under the same management and students enrolling at one of these Colleges may change to the other without loss of time, change of text-books or additional tuition charges.

Both Colleges in session thruout the year. Enroll for our Summer Courses, and we will send you to a good business or banking position immediately upon graduation.

For free catalog and particulars write—G. M. LANGUM, Pres., Bismarck, N. Dak.

Mr. Oliver Towne (ALL OVER TOWN)

I approached ten people at random on the street the other day, and inquired if they had anything they wanted to buy or sell. And they all did. Everybody has!

I ran ads in the want ad column of this paper and bought or sold everything from fishing tackle to ostrich feathers.

'Phone me, and I'll wager I can buy, sell or exchange whatever you have in mind.

The TRIBUNE

Bismarck, North Dakota

LONDON PRESS PRAISES U.S. EFFICIENCY

American Tells of Benefits To Be Gained From English

TRAFFIC EXAMPLE

London, Aug. 21.—London newspapers have contained many articles of late about things that are better done in America, and especially in New York, than they are here. Englishmen have been told in effect by the writers of these articles that they should not consider themselves properly educated until they have been to America and found out how much they don't know.

And now by way of contrast, it would seem, an American businessman, W. S. Ashby, tells in the Daily Chronicle of various things he has seen here which are much better done in New York. Especially does he commend the handling of the street traffic in London as compared with New York's way of doing it.

"The first thing to impress one on arriving from New York," he said, "is the quiet and absence of hurry. At first thought one might surmise that the English are slow, and we have had enough reports to that effect to warrant our thinking so."

"But first impressions, while vivid, are wrong. There is an absence of bustle and noise, but no appreciable sacrifice of speed."

"At the crossing there is no shrilling of traffic officers' whistles, no barking of pedestrians on the curb, no stopping of vehicular traffic for blocks."

"The traffic officer is in the midst of it all and is busy every moment. He stands there, calm, deliberate, almost in a detached sort of way, but there is precious little that misses his eye."

"And here is another thing about the English—their courtesy. They are anxious to help, and 'please' and 'thank you' are frequently used words in the language."

"The bus conductor thanks you for your fare, the waiter thanks you for your tip, the lift man thanks you when you give him the number of your floor."

"The London policeman knows his London and directs you promptly, politely, and accurately, without waste of words."

"The Londoner does not stop, crowd or hustle, but he knows where he is going, and will gladly help you get where you are going in an orderly, comfortable and quick way."

"So if one were to check up on the question I would say that for all the Londoner's apparent desolation, he is moving towards his destination as quickly far less New Yorker, and making far less hubub about it."

"It is in this quiet efficiency that is misleading, and is so often mistaken for slowness."

P. O. PROTECTS PUBLIC FROM SWINDLERS

Eliminates "Get Rich Quick" Circulars From Mails

GATHER EVIDENCE

Fake Stock Is Principal Commodity Dealt in by Swindlers

Washington, Aug. 21.—The United States government takes considerable care in protecting the bank accounts of its citizens, and many and varied are the schemes that it is called upon to use in order that the gullible will not lose their savings of years. But perhaps the most interesting of all is the method of the Post Office Department, which issues "fraud orders" to eliminate from the mails the circulars and advertisements of the get-rich-quick swindlers.

How much this system actually saves investors during a year it is almost impossible to estimate. In one recent instance, as the result of a single fraud order, 21,000 letters, each believed to contain a dollar bill, were intercepted and returned to the senders.

When investigators of the Post Office suspect an individual or company of sending through the mails letters or advertising matter of a fraudulent nature, inspectors are given the case to gather evidence. Should suspicions be backed by facts, the persons are cited to give a reason why a fraud order should not be issued against them. A hearing is conducted and, if the charges are sustained, all postmasters are ordered to return to the senders all mail addressed to the person or company in question. Those not bearing return addresses find their way to the Dead Letter Office, and the money enclosed is turned into the national treasury. Very often the fraud order is followed by court action against the offenders.

In recent months Postmaster General New has instituted a determined campaign against mail

frauds. Especially have his efforts been directed against swindlers of worthless oil, stock and lands in the Southwest. As a result many operators have been tripped up in their promises of thousands of percent of profit to their dope investors.

Fake stocks are the principal commodity dealt in by those who mislead gullible readers of circulars and advertisements, but many unique and interesting schemes have been uncovered by the department's activities. One of the most recent was the case of a man who advertised bloodied hunting dogs at very low prices and delivered mugs picked up at random, with fake pedigrees.

Another advertiser boasted of having found a sure cure for tuberculosis, but when government chemists discovered the brown, syrupy liquid was mainly creosote and maltose, a fraud order speedily put him out of business.

Schemers to beat the prohibition laws often come to the attention of the postal authorities. Several consisted of powders to which water was to be added to produce wines, beers or other alcoholic drinks. Officials held that if the materials actually contained alcohol they violated the dry laws, whereas if they did not they violated the postal fraud regulations.

PHEASANT IS INDICATOR OF EARTHQUAKE

No Seismograph Necessary When Birds About, Says Scientist

SENSITIVE TO EARTH

Animals Sensitive to Tremors Before Humans

Washington, Aug. 22.—Have you a little earthquake-predictor in your home? If not you should get a pheasant, says Prof. F. Omori, a Japanese seismologist writing in a recent bulletin of the Imperial Earthquake Investigation Committee, for this bird is exceedingly sensitive to earth tremors even when so slight as to be unobservable by humans.

Observation of a pheasant in Japan during a period of about three years, in which 23 earthquakes were recorded on delicate instruments, showed that it crowed either before, or during, every slight shock. In 34 percent of the cases the bird crowed before the scientist's machine recorded the quavers, beating the instrument by as much as eight seconds. In 20 percent of the occurrences the bird crowed simultaneously with sensible earthquake motion; and in another 20 percent of cases the bird crowed when the motion was too slight to be sensible to the observer. In only five cases did the pheasant crow after the motion was recorded, and only once did he fail to crow at all.

The keen perception of earthquake occurrence by the bird is no doubt due to its acute sense, by which it is enabled mechanically to feel the small vibrations in the preliminary stage of the seismic motion, Prof. Omori says. It is known that earth shocks are preceded by preliminary tremors that are so slight as to be hardly recordable. That the pheasant should be very sensitive and take alarm at the slightest disturbance, either natural or artificial, is probably a condition necessary to its existence, the scientist declares, as the bird with its long pointed tail and comparatively small wings, has no high flying capacity and nestles on the ground among the thick undergrowth.

It was observed, however, that the pheasant did not take alarm and crow when the ground was shaken by the passing of cars, heavily loaded trucks or wagons, or other artificial means.

In Japan, Prof. Omori writes, there is a general belief that pheasants perceive earthquakes much earlier than humans. Certain other animals show symptoms of terror at the time of, or previous to, an earthquake, he adds, and cites several occasions when the musical croaking of frogs in a pond ceased just before or at the moment of a sensible tremor. If the shock be strong there is caused a general noise, cocks crowing and dogs barking.

A certain abbot was riding a horse near a town that was visited by a strong quake, when suddenly the animal dropped flat on the ground. The rider, who had not yet perceived the shock, attempted to urge the horse to his feet, but all his whipping was in vain until the shaking was over.

W. C. T. U. Celebrates 50th Anniversary

Columbus, Aug. 22.—The Women's Christian Temperance Union will celebrate the fiftieth year of its existence by coming back to the state that gave it birth—Ohio—for its annual convention.

It was just about a half century ago that "Mother" Thompson at Hillsboro, Ohio, surrounded herself with a band of militant women intent upon one thing: the putting out of business of liquor selling establishments. From that informal organization grew the Women's Christian Temperance Union which now has organizations in every state of the United States and reaches into 57 foreign countries.

The "Jubilee" convention will be held here September 4 to 14. Twelve hundred delegates will attend.

Important aspects of the meeting, which will have law enforcement as its theme, will include a possible pilgrimage to Hillsboro, a street pay-

primage to Hillsboro, a street pageant and a "march of allegiance to our flag and country" in which 5,000 women are expected to participate.

England Spent \$29,000,000 In Occupation of Turkey

London, Aug. 22.—It has cost England \$29,000,000 sterling for the occupation of Constantinople and the adjacent area since the Armistice in 1918, Premier Baldwin told the House of Commons recently.

These figures, he added, did not represent the extra cost to the taxpayer of the occupation, since the greater part of the occupying forces would otherwise have been employed elsewhere. The extra cost was estimated at 16,000,000 lbs. sterling. The Premier further stated that the Allied governments have decided to forego any claim against Turkey for the cost of occupation of Turkish territory.

Says American Movies Corrupt Foreign Morals

Philippines, Bulgaria, Aug. 22.—"American film presentations which would not be tolerated in America are doing their conspicuous share in ruining the morals of the Near East," said Dr. T. T. Holloway, American missionary and educator in Bulgaria, in speaking recently with a representative of The Associated Press.

"In three recent crimes which have stirred the public, police investigation has disclosed that the inspiration of the crime, and the suggestion of the method by which it was attempted, came from an American film recently shown in the community."

"In one criminal attempt a prominent citizen was instructed by the 'Black Hand' to deposit a large sum of money in the corridor of a railroad car. The agent of the 'Black Hand' appeared to collect, and the investigation that followed his arrest proved conclusively that his inspiration came from an American film called 'The Secrets of New York.'

"In a case of boy banditry it was proved that the suggestion of the crime came from another American film. In still another case, where a robbery by adult bandits was committed, it was also discovered that the suggestion as to both crime and method came from an American film then running locally."

"A doubly regrettable feature of such presentations is that they utterly misrepresent America and show it to the credulous in the light of a country where the criminal is king."

TITLED CANDY MAKERS REFUSE TO JOIN UNION

Saalfeld, Saxe-Meiningen, Aug. 22.—Needy countesses and baronesses who work in a large chocolate factory here caused a brief outlaw strike the other day by refusing to join the Socialist bon-bon makers' union.

The demand that they take out membership cards had been made to the women out of working hours several times previously, but always rejected. Finally a walking delegate sought out one of the titled ladies at her work-bench. Her indignant refusal to join the union caused such a commotion in the plant that the delegate was thrown out, a workers' mass meeting was held, and a strike proclaimed. Later the laborers tried to return to work, but found themselves locked out. A settlement was reached, however, after a few hours.

Most of the titled employees, and a number of ladies of the former royal court who also work for the firm, come from the neighboring town of Rudolstadt, capital of what was once the principality of Schwarzburg-Rudolstadt. The factory's distinguished payroll includes also the widow of a former cabinet minister.

FREIGHT TRAFFIC RESUMED

Moline, Ill., Aug. 22.—With four new motor barges, freight traffic on the Mississippi between St. Paul and St. Louis will begin soon after a lapse of more than four years, the River Transit Company of St. Paul

will submit a report for the use of the division of fisheries and game which is endeavoring to perpetuate the species.

The flock under the state's care

has announced.

Freight hauling will begin not later than September 1.

The motor barges on their route between St. Louis and St. Paul will cover 689 miles. Ninety landing places are tabulated on a list. The boats will have a 100-ton cargo capacity.

fluctuates in numbers considerably from year to year. It has numbered thousands, and at other times has been almost as small as it is at present, but no earlier record has disclosed any such decrease in the female birds.

London Press Praises U.S. Efficiency

American Tells of Benefits To Be Gained From English

TRAFFIC EXAMPLE

London, Aug. 21.—London newspapers have contained many articles late about things that are better done in America and especially in New York than they are here. Englishmen have been told by the writers of these articles that they should not consider themselves properly educated until they have been to America and found out how much they don't know.

And now by way of contrast, it would seem an American business man, W. S. Ashby, tells in the Daily Chronicle of various things he has seen here which are much better done than in New York. Especially does he commend the handling of the street traffic in London as compared with New York's way of doing it.

"The first thing to impress one on arriving from New York," he said, "is the quiet and absence of hurry. At first thought one might surmise that the English are slow, and we have had enough reports to that effect to warrant our thinking so."

"But first impressions, while vivid, are wrong."

"There is an absence of bustle and noise, but no appreciable sacrifice of speed."

"At the crossing there is no shrilling of traffic officers' whistles, no barking of pedestrians on the curb, no stopping of vehicular traffic for blocks."

"The traffic officer is in the midst of it all and is busy every moment. He stands there, calm, deliberate, almost in a detached sort of way, but there is precious little that misses his eye."

"Instead of holding up traffic in long intervals, the officer seems to keep it moving along in all directions at once, and at many of London's corners the 'all directions' is well used, for streets radiate in several directions. He directs traffic, rather than stops it and starts it."

"And here is another thing about the English—their courtesy. They are anxious to help, and 'please' and 'thank you' are frequently used words in the language."

"The bus conductors thank you for your fare, the waiter thanks you for your tip, the lift man thanks you when you give him the number of your floor."

"The London policeman knows his London and directs you promptly, politely, and accurately, without waste of words."

"The Londoner does not push, crowd or hustle, but he knows where he is going, and will gladly help you get where you are going in an orderly, comfortable and quick way."

"So if one were to check up on the question I would say that for all the Londoner's apparent dejection, he is moving towards his destination as quickly far less New Yorker, and making far less hubub about it."

"It is this quiet efficiency that is misleading, and is so often mistaken for slowness."

P. O. Protects Public From Swindlers

Eliminates "Get Rich Quick" Circles From Mails

GATHER EVIDENCE

Fake Stock Is Principal Commodity Dealt in by Swindlers

Washington, Aug. 21.—The United States government takes considerable care in protecting the bank accounts of its citizens, and many and varied are the schemes it is called upon to use in order that the gullible will not lose their savings of years. But perhaps the most interesting of all is the method of the Post Office Department, which issues "fraud orders" to eliminate from the mails the circulars and advertisements of the get-rich-quick swindlers.

How much this system actually saves investors during a year it is almost impossible to estimate. In one recent instance, as the result of a single fraud order, 21,000 letters, each believed to contain a dollar bill, were intercepted and returned to the senders.

When investigators of the Post Office suspect an individual or company of sending through the mails letters or advertising matter of a fraudulent nature, inspectors are given the case to gather evidence. Should suspicions be backed by facts, the persons are cited to give a reason why a fraud order should not be issued against them. A hearing is conducted and, if the charges are sustained, all postmasters are ordered to return to the senders all mail addressed to the person or company in question. Those not hearing return addresses find their way to the Dead Letter Office, and the money enclosed is turned into the national treasury. Very often the fraud order is followed by court action against the offenders.

In recent months Postmaster General New has instituted a determined campaign against mail

frauds. Especially have his efforts been directed against purveyors of worthless oil stock and lands in the Southwest. As a result many operators have been tripped up in their promises of thousands of percent of profit to their dupe investors.

Fake stocks are the principal commodity dealt in by those who mislead gullible readers of circulars and advertisements, but many unique and interesting schemes to market other commodities have been uncovered by the department's activities. One of the most recent was the case of a man who advertised blooded hunting dogs at very low prices and delivered mongrels picked up at random, with faked pedigrees.

Another advertiser boasted of having found a sure cure for tuberculosis, but when government chemists discovered the brown, syrupy liquid was mainly creosote and maltose, a fraud order speedily put him out of business. Schemes to beat the prohibition laws often come to the attention of the postal authorities. Several consisted of powders to which water was to be added to produce wines, beers or other alcoholic drinks. Officials held that if the materials actually contained alcohol they violated the dry laws, whereas if they did not they violated the postal fraud regulations.

PHEASANT IS INDICATOR OF EARTHQUAKE

No Seismograph Necessary When Birds About, Says Scientist

SENSITIVE TO EARTH

Animals Sensitive to Tremors Before Humans

Washington, Aug. 22.—Have you a little earthquake-predictor in your home? If not you should get a pheasant, says Prof. F. Omori, a Japanese seismologist writing in a recent bulletin of the Imperial Earthquake Investigation Committee, for this bird is exceedingly sensitive to earth tremors even when so slight as to be unobservable by humans.

Observation of a pheasant in Japan during a period of about three years, in which 23 earthquakes were recorded on delicate instruments, showed that it crowed either before, or during, every slight shock. In 34 percent of the cases the bird crowed before the scientist's machine recorded the quavers, beating the instrument by as much as eight seconds.

"In a case of boy banditry it was proved that the suggestion of the crime came from another American film. In still another case, where a robbery by adult bandits was committed, it was also discovered that the suggestion as to both crime and method came from an American film recently shown in the community."

GAME BIRDS FACE EXTINCTION

Vineyard Haven, Mass., Aug. 22.—The North American heathen which, so far as is known, is today making its last fight against extinction of the protected public reservation of Martha's Vineyard, is now near the vanishing point, according to the reservation superintendent. Now more than 50 of the birds are left on the island—and in the world—and most of them are males, the report sent to the State Department of Conservation states forth.

A census was taken by Commissioner William C. Adams with the assistance of Professor Albert O.

Gross of Bowdoin College, who, at

the close of this season, will submit

a report for the use of the division

of fisheries and game which is en-

deavoring to perpetuate the species.

The flock under the state's care

is as follows:

What the World Is Doing

AS SEEN BY POPULAR MECHANICS MAGAZINE

Racing Auto Takes Gas and Oil "On the Run"

While racing along at a speed of nearly 50 miles an hour to break a record, an automobile recently was supplied with gas, oil, water, and relief drivers without stopping the car during a 3,150-mile run made in 50 hours 21 minutes. Although three stops were made for tires during this time, the engine was kept going without pause.

All the other supplies were taken aboard, without stopping the machine, from another car which ran alongside during the period of delivery.

Radio Speeds Up Taking of Moving Pictures

Radio carried orders of the movie director to 5,000 members of the cast in a big scene in a western studio, recently. Where, usually, the megaphone is used to shout instructions, while cameras are turning the cranks, this director, standing at a point from which he had a clear view of all the actors, spoke his orders calmly into a sending instrument, which made it heard clearly all over the lot. The directing, somewhat difficult because of the number of people employed, was simplified by use of radio, and the movie man predicted that it will be repeated in other big scenes. The same system was used to increase the carrying power of broadcast messages and concerts at the receiving end. Use of radio in this

case not only spared the director's voice, but it produced better results by making it possible for all the actors quickly to go through with the scene without frequent stops.

Make Poison-Gas Test in Three Minutes

Simple tests to find the degree of poisoning from a gas known as carbon monoxide are now possible with the invention of an instrument that shows how much a person has been affected within three minutes, where formerly it took from 24 to 48 hours before this could be accurately determined. The apparatus may be carried in the pocket and is expected to prove of particular value in mines, where this gas is a much-dreaded menace. Because of the compactness of the new instrument and the fact that it can be applied to a patient by one who has had no special training, it will be of broad general service, it is predicted. Government experts, who tried it on a young girl, assert that it is the quickest method known to detect the gas.

Equipping the Wheelbarrow with Shock Absorbers

The shocks suffered when pushing a wheelbarrow over rough ground can be largely eliminated by providing the wheel with shock absorbers made from buggy-spring leaves. The leaves used for this purpose have eyes at the ends; each is cut to a length of about 8 in. and has three countersunk holes drilled through it.

The eyes are reamed out so that they will accommodate the axle of the wheel and allow it to turn easily, and the springs are screwed to the underside of the wheelbarrow frame, the eyes being turned down.

Secure Latch for Paddocks

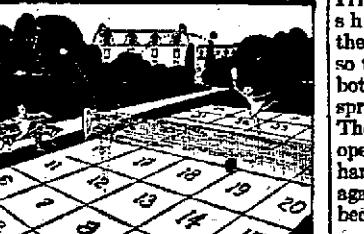

It is desirable to have the gates of stables and paddocks provided with a latch that cannot be opened by the horses. A good latch,

that is absolutely secure, and has been found to be very useful on the stallion paddock at the University of Illinois, is shown in the drawing. The gate is made so that it touches the gatepost at the bottom, first, and the top must be sprung in in order to hook the latch. There is not a chance for the gate to open when the latch is in position; the harder the stallion runs or pushes against the gate, the tighter the latch becomes.

Beeswax makes a better lubricant for tall centers than the usual white lead, oil, or grease.

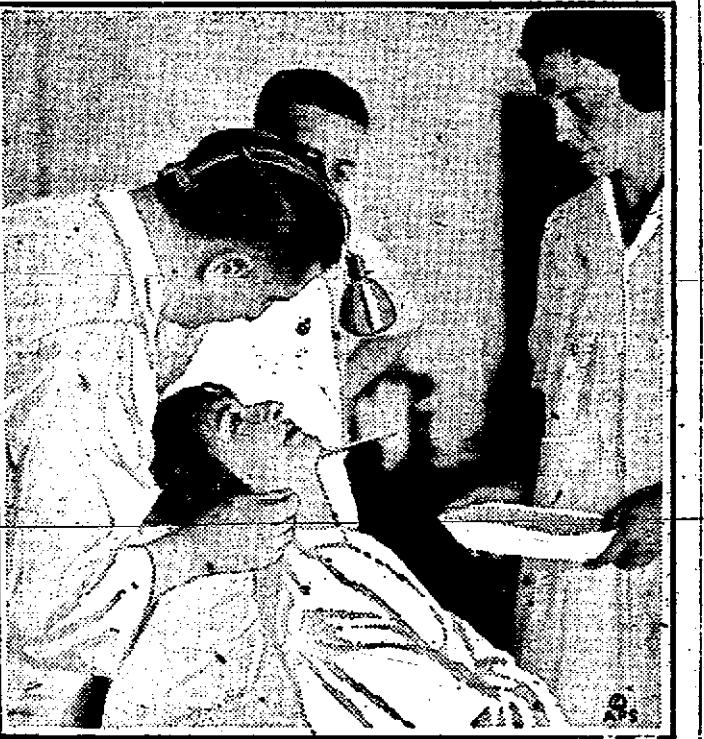

Tennis Court in Squares to Teach Accuracy

Looking like a great checkerboard, except that each square has a number, a tennis court has been devised to teach accuracy. While an instructor calls out the numbers, the player is required to place the ball in the required section. The practice provides train-

ing not only for the hands and feet, but also for the mind, because of the quickness with which the numbers are called.

FANNIE BRICE WANTS NEW NOSE

Fannie Brice, noted comedienne and wife of the famous Nicky Arnstein, has decided that she wants to have her nose changed. Dr. Henry J. Schireson, plastic surgeon of Chicago, went to Atlantic City to change the nose from Roman to Grecian. Here he and nurses are preparing Fannie for the operation.

BOY, PAGE IZAAK WALTON!

The gentleman in the center lived before his demise in the salty waters of the Gulf of Mexico. He is a Warsaw fish, and resembles a black bass in almost every detail. Note his height: 1.1 weight on the card. Fred Gerstner (left) and Edward Muller (right), both of New Orleans, caught the fish.

Mr. and Mrs. John Bunting returned yesterday from a vacation at Nevis, Minn., with Dr. and Mrs. F. E. Bunting. The latter will return in the near future from their summer home.

FORD CAR STOLEN.

Marmarth, N. D., Aug. 22.—For the first time during the summer, M. C. Newstrom, manager of the Rochdale Cooperative Co., placed his Ford car in a garage last Sunday night, only to discover in the morning that it had been stolen. The same night thieves broke into the Palace Meat Market, rifled the till, securing \$20, and evidence that burglars had entered the Kelly Garage was also found the next morning.

Girls Stop When They Realize How They Look, Says Teacher

GIRLS STOP WHEN THEY

By NEA Service

San Diego, Calif., Aug. 22.—The next time Mary Ellen starts out for the country club, dance, tell her how pretty she looks and that she's going to be the most graceful dancer on the floor.

For a consciousness of one's personal appearance will do more than all else to clear up the jazz era of dancing, says Hulda Hunker of this city. She's been 30 years since Hulda Hunker started telling young people the why and wherefore of the heel and toe. And in all those 30 years she's never encountered a young person who insisted on going to extremes in dancing.

"It is the same with boys. Boys won't admit it, but they're vain than girls. Get a boy to thinking about his hair, his shoes, his fingernails. Praise him for his walk, and admire the way he carries his shoulders, and he'll never fall into the slinking ways of the dance hall lizard.

"There is hardly any other question of behavior on the dance floor that will not resolve itself purely into a matter of taste. Give the young people judgment and a sense of personal pride and the jazz era will lose every one of its objectionable features."

Self Predominant

"Then is the time to turn this extra exuberance into thoughts of self. Yea, I mean it. There is a consciousness of self which every one should have. Selves can ex-

press crudeness and vulgarity or they can express grace and beauty.

"If a young girl in my classes

shows a tendency to want to elicit

her partner about the neck, I don't

tell her outright that it is in bad

taste. Instead, I praise her clothes,

her hands, her walk. If she has

danced particularly well at some

other time, I recall it to her.

Boys, Too

"And I have never known a girl, once she realized it was possible to express beauty in her dancing, who didn't want to express that beauty

"It is the same with boys. Boys won't admit it, but they're vain than girls. Get a boy to thinking about his hair, his shoes, his fingernails. Praise him for his walk, and admire the way he carries his shoulders, and he'll never fall into the slinking ways of the dance hall lizard.

"There is hardly any other question of behavior on the dance floor that will not resolve itself purely into a matter of taste. Give the young people judgment and a sense of personal pride and the jazz era will lose every one of its objectionable features."

HULDA HANKER

WORLD'S ONLY GAMBLING SCHOOL

A German gambling casino has been opened at the summer place at Zopper and to secure managers and croupiers for the tables a school for gambling has been opened. Here some of the pupils are being shown the ins and outs of six-handed baccarat.

QUOTATIONS UP ABROAD

LIVERPOOL QUOTATIONS INFLUENCE CHICAGO MARKET

Chicago, Aug. 22.—Higher quotations at Liverpool gave strength to

quotations on this side of the Atlantic during the early dealings. Offerings increased and an early advance was checked. Predicted frost for most parts of Canada failed to be realized and fair and warmer weather is expected in the domestic wheat region. There was some scattered commission house buying on both sides of the market but trading was light. Opening prices which ranged

from unchanged figures to 3.8 cents higher with Dec. \$1.04 5-8 to \$1.04 3-4 and May \$1.10 1-8 to 1.10 1-4 were followed by a little further rise and then a decline to a trifle below yesterday's finish.

Operating a switchboard in a busy telephone exchange is so great a strain that few girls can stand it for as long as eight years.

THE BISMARCK BUSINESS COLLEGE AND THE BISMARCK BUSINESS COLLEGE

Roberts and Second Street North, Fargo, N. Dak.

Consolidated, will hereafter be under the same management and students enrolling at one of these Colleges may change to the other without loss of time, change of text-books or additional tuition charges.

Both Colleges in session thruout the year. Enroll for our Summer Courses, and we will send you to a good business or banking position immediately upon graduation.

BOY WIZARDS

A wonderful boy astronomer lives in Athens, Greece. He is William Nelson Abbott, 16 years old.

This lad was the first to make the discovery, some weeks ago, that the star Beta Ceti had "flamed up" to the extreme brilliancy known as "start of the first magnitude."

Astronomy has been his hobby since he was 11. And he is so far advanced in this great scientific field that he has been given honorary membership in the Societe Astronomique de France and the Association Francaise des Observations d'Etapes Variables of Lyons.

Young Abbott is descended from an Englishman who went to the Near East as a Crusader, centuries ago, and settled in Greece. That ancestor certainly would have been dumfounded if he could have known that one of his descendants would be such a boy prodigy at astronomy. That's the great fascination of parenthood—the uncertainty as to our descendants, their mentality and careers.

Abbott made his discovery, about the star Beta Ceti, with his naked eye. Then, he says:

I went to the telescope to compare Beta with the star Aldebaran, which is taken as a unit, and found that Beta had increased in brilliancy more than three magnitudes. I determined the star's position on a chart and telephoned to the Athens Observatory, where it was said that nothing had been observed.

"I telephoned next day to M. Flammarion, the astronomer in Paris."

Flammarion checked the lad up, found he was right.

You recall the Polish boy chess wizard. On his heels comes this lad in Greece, apparently destined to be one of the world's greatest astronomers, possibly the leader.

Margaret Maguire, Philadelphia educator, originator of schools for backward pupils, tells about a boy who came under her observation. He seemed to be the champion dumb-bell, half asleep and disinterested in the subjects that the teachers brought to his attention.

"Then," says Miss Maguire, "some one happened to mention radio. And the boy stood up and began to lecture on radio in technical terms that amazed the teachers."

That boy had, born in him, the scientific intellect that is characteristic of the rising generation. When a grown-up hears some of these knee-trousers lads talking about radio—well, it rather makes him feel that the older generation belongs to an obsolete period.

The world is entering a great scientific age. The rising generation reveals that, clear-cut, unmistakably.

HOME AGAIN

Well, folks, how did you enjoy your vacation this year? It's getting to be a common saying, about coming home to rest up from vacation.

Home looks better than any place on earth, after we have been away from it for awhile. The truest expression in our language, or any other, is: "No place like home."

One family returning from vacation have had a great trip, playing gypsy in a flivver, camping on the way and taking their time about it. Father had some good fishing, and at various stops he settled the affairs of the world with other ramblers, fellow-gypsies. Mother, of course, had more work than at home, what with keeping track of her flock, but that's in the order of things, she expected it. The children were the only ones that had a real vacation.

No place like home.

The second big thought that occurs to all of us, when we get back home to running water and soft beds and conveniences such as daily mail, is that we are slaves to Father Time.

Fifty weeks of the year, most of us toil.

Two weeks we have for vacation—for relaxation, diversion and recreation—a pauper, miserly pittance in which we are expected to recuperate ourselves sufficiently to be strong enough to "stand the gaff" for another year.

Many of us—more than will admit it—really work harder during vacation time than we do during the balance of the year. But we enjoy it, because the labor is not compulsory. An ideal sort of civilization would be one in which no one would work unless he had to. Work then would be fun, nearly every one would want to.

Civilization's goal seems to be to escape from compulsion. That's the Vacation Spirit.

DOLLAR'S VALUE

The dollar is worth only 65 cents now, on the 1913 basis, says Professor Irving Fisher. He means that \$1 now will, on the average, buy only as much as 65 cents bought in 1913. He has wholesale markets in mind. But the situation is almost identically the same when it comes to retail prices—cost of living.

This is a sad blow to the man who saved dollars in 1913 and now finds them worth only 65 cents apiece. But there's no use getting discouraged. For the rule is beginning to work in the opposite direction—the 65 cents saved today will be worth \$1 later, in buying power. You'll realize this, in full, about 1950. Far off? It'll be here before you realize it—and it'll come when most of us will need the money more than at any time in life.

PULL

How powerful is this horse? How much can he haul? These questions have been pondered millions of times by farmers in almost countless generations, prior to a horse trade or purchase.

The pulling power of horses has always been more or less a matter of guesswork. Not any more. Davidson and Collins, professors at Iowa Agricultural College, invent a hydraulic wagon that registers exactly what a horse can do in harness.

The idea is so simple it's a wonder someone didn't think of it before. That's the way with an almost infinite number of other useful and profitable devices waiting to be discovered.

Editorial Review

GRATIFYING BUT USELESS

Newspaper dispatches that depict the State owned flour mill at Grand Forks grinding at full capacity to fill orders, are gratifying.

But there existed no situation that called for the investment of several millions of dollars of public funds and the pledging of the state's credit for more millions, simply to supply flour to a numerous populace. Private mills have always met the demand in the past, and they would be meeting the demand today had the state mill not been built.

The mere fact that the state mill is grinding 24 hours a day doesn't justify the State investment in the property, or the hazard to which the State is subjecting itself in the operation of the property.

Only when the mill affects grain and flour prices will it meet up with the expectations of its sponsors, who insisted that the State, by engaging in the milling business, could increase the price of wheat and decrease the price of flour.

That happy time seems just as remote now as it did when the soap boxers were so industriously painting the glories of "The New Day."—Fargo Forum.

HOW TO SAVE

Saving money is like everything else: that counts and that puts people ahead.

Seven out of ten people are spending, with a vague hope that something like a stroke of lightning out of a clear sky will bring them fortune—which never happens—and wondering how some others manage to lay by something.

And the others are not wondering how people manage to save, not spending all they can get their hands on and waiting for the sky to rain larks but they are saving.

Which explains why fewer succeed than fail, why fewer are rich than are poor.

For the only way to save is to save.

The average individual with an eye to saving money against adversity or old age will plan out a budget taking care of what he thinks are his needs with an idea of leaving a margin for saving. When it is attacked that way there is no margin, and therefore no saving.

That process should be reversed. The saving should be put first. The individual should decide what he ought to be saving, and then take out and put it in the savings banks and get along on the remainder. He can do it; if he tries he will do it. He would do it if his income were reduced that much; he would because he had to. If he takes his income for his savings account and then pretends his income has been reduced that much, he will save. And most people will save in no other way.

Those who are waiting until there is a surplus to be saved will never reach that point no matter how great their income may grow; because those who plan that way have a fatal habit of letting their wants expand at a slightly faster rate than their income grows.

The only way to save is to save. —Duluth Herald.

ADVENTURE OF THE TWINS

By Olive Roberts Barton

EVERYBODY in Pee Wee Land was very busy. It was washing day for Mrs. Tiny Mite, ironing day for Mrs. Upside-Down (who had washed the day before), baking day for Mrs. Fry (who had her washing and ironing all done and put away) and cleaning day for Mrs. Jumper.

Every single Pee Wee was busy—even King Snookums and his lord high chancellor.

But one person wasn't as busy as he should have been. Or rather he was busier than he should have been—for he was going to do something that he wasn't allowed to do. And he was sneaking off without anybody seeing him.

That person was Winky Wank Pee Wee.

He slipped out of Pee Wee Land, and skedaddled across the daisy patch and crept across the sassafras garden to the porch of Farmer Brown's house, where a lovely vine with smelly flowers shaded it from the sun.

The next thing Winky Wank did was to climb the vine like a steeple-jack and when he crawled half way up he slipped into one of the smelly flowers and waited.

By 'n' there came a buzzing. Pretty soon the buzzing stopped.

It was Mister Bee, and he had stopped on the very posey where Winky Wank was hiding. Winky Wank winked at himself and watched his chance.

When Mister Bee was busy drinking up honey juice, didn't the little Pee Wee boy give a spring and land right on Mister Bee's back!

And Mister Bee was so surprised that he almost lost his balance for a minute.

But he didn't lose it—quite—and the next minute he was flying away and buzzing like eleven airplanes. He usually only buzzed like one airplane but he was so angry about Winky Wank stealing a ride that he turned on every buzzer he had.

"Now I'm an aviator!" cried Winky Wank, waving his cap with one hand while he held onto Mister Bee with the other. "I've always wanted to ride a buzz bee, but mother wouldn't let me. Hurrah!"

What happened then I'll tell you tomorrow.

Social and Personal

Fortnightly Club Women to Study Mysterious East

Those mysterious countries called "The Near East" will be studied by members of the Fortnightly club during the coming club season. As a precaution and to prevent misunderstanding the countries including Syria, Mesopotamia, Armenia, Turkey, Greece, and Persia were selected as the most representative and the ones which the women wished to study. The club's new program is worked out in such a manner as to include the most important phases of the subjects included in the program.

At the first meeting of the season, September 26 Mrs. W. L. Nueisle will discuss "Who are the Turks." This will be followed at the later meetings with such leading subjects as "Syria—Biblical and Modern," "Mesopotamia—Old and New," "Armenia and the Armenians," "Greece—Its Relationship to the Near East," "Persia," "The Balkan Wars," "The Dardanelles," "The European War—1914-18," and "Treaty of Versailles and League Conference."

After a study of the geographical significance of the various countries and their historical development the development of their educational system and religions will be taken up in its various phases. Various movements will be taken up later and some of the outstanding characters of "Mu-tapha Kemal Pasha and prominent women.

A feature of the winter program will be a debate "The Turk vs the Armenian" in which Miss Minnie J. Nielson, Mrs. F. L. Conklin, Mrs. A. M. Brandt, and Mrs. A. M. Christianson will affirm and defend various sides. The cities which have figured so prominently in news dispatches about battles and movements, Constantinople, Aleppo, Beirut, Smyrna, Salonika, and Angora will be examined at one of the meetings.

Arrangements of the program for the year were in the hands of Mrs. F. R. Smyth Mrs. R. Worth Lumry, and Mrs. William Langer. While Miss Alma K. Kerr, missionary in the Near East, was visiting in Bismarck during the summer she was consulted in regard to the selection of certain of the topics. It is expected that during the club season various speakers who have had the opportunity of residing or visiting in the Near East will address the club members.

STRAUSS FAMILY RETURNS Dr. and Mrs. F. B. Strauss and family returned last night from Green Lake, Spider, Minn., where they have been spending the summer of their "summer" home. Dr. Strauss and daughter returned on the train while Mrs. Strauss and the other members of the family returned by automobile. Frederick Strauss made the 427 miles from the lakes by automobile in time to meet his father at the station. L. W. McLean and son, Lester, who have been visiting at the Strauss home accompanied them home. Mrs. McLean preceded them by a few days.

VISITORS DEPART Mrs. J. A. Reed and daughter, Miss Jure, of White Bear, Minn., formerly residents of Jamestown, who have been visiting at the home of Al Foster and family of near Wilton and Mr. and Mrs. F. C. Ellsworth and Thomas Hall of the city left today for Killdeer and Dickinson, where they will visit with friends.

VISITING SISTER Mrs. Marion Whitestone of Seal, Wash., who has been visiting with her sister, Mrs. F. S. Morey for the past month left last night for St. Paul, Minn., to attend the wedding of her niece, Miss Marion Freiseth and Harry Fowler Friday in St. Paul.

VISITING FORMER HOME Mrs. Frank Simon left this morning to visit with friends in Fargo, and at her former home in Detroit, Minn., for a couple of weeks, while Mr. Simon is assisting in the office of the attorney general.

Simple Summer Slipovers Showing New Lines

Every summer has its slipover dresses and those of this season are no less attractive than the ones we wore last year. Simple as they are, though, there's not one but shows the influence of new lines. No garment is too simple to be fashionable! Notice the low-bloused bodice of one of the models reproduced—the wide belt fitting snugly around the hips. An inverted pleat outlined with stitching forms a full length front panel on another. A third has top and bottom stitched together in the same zig-zag line as that used for chemise frocks.

Long and short sleeve blouses are worn with these sleeveless dresses and they may be tailored or frilly, as one prefers.

McCall's

RETURNING HOME Mrs. F. A. Schroeder and daughter, Miss Lillian left this morning for their home at Grand Forks. Mrs. Schroeder recently underwent an operation at the Bismarck hospital, and Miss Lillian is a graduate of the nurses training school. Enroute they will stop in Valley City to visit with Mrs. A. Eckel.

GUESTS OF MISS EASTON Harry F. Easton and son, Ralph, and Miss Genevieve Easton of Tioga stopped over here yesterday with their sister, Miss Lucille Easton. Mr. Easton and Miss Easton are enroute to their home after visiting in Minot, Minn.

MRS. VAN HOOK RETURNS Mrs. L. Van Hook returned last evening from a two weeks vacation trip with relatives in Michigan, Illinois, and Kansas. In Detroit she visited with her daughter, at Topka, Kan., with two sisters and with a niece at Leavenworth, Kan., and in Chicago with two brothers.

GUESTS OF MRS. HENDERSON Mrs. S. G. Larabee and daughter, Miss Muriel of St. Paul, Minn., are guests at the home of Mrs. Larabee's aunt, Mrs. Catherine Henderson for a few days.

RETURN HOME Mrs. A. W. Cook and daughters, Misses Nana and Mary who have been visiting with relatives and friends at Regan and Wing for the past week returned home yesterday.

BIRTHDAY SURPRISE Dr. A. W. Munson was pleasantly surprised last evening by number of friends when they appeared at his home to help him celebrate his birthday. The visitors spent the evening in playing games and a birthday luncheon in which the large birthday cake occupied a place of honor on the table. Bouquets of sweet peas formed a center piece on the dining room table. The guests departed after wishing Dr. Munson happiness and presenting him with remembrances of the happy occasion.

RETURN FROM BLACK HILLS Mr. and Mrs. D. Patient, Mrs. Violent Altman and Miss Adele Kauffman, who have been enjoying a vacation trip in the Black Hills, returned last night.

John Ozman of Wilton, was a city caller yesterday.

TO VISIT MISS PEARCE Miss Kathryn Welch of Philadelphia, Pa., is expected to arrive Sunday to visit for a few days with Miss Hazel Pearce, Miss Welch, a teacher of domestic science, has been spending her vacation in Spokane and Seattle, Wash.

RETURN FROM LAKES Mrs. A. J. Arnott of Bismarck and Mrs. Charles Howe of Wilton who have been visiting with their mother at LeRoy, Minn., and Detroit lakes for the past three weeks returned yesterday. Mr. Arnott and Mr. Howe joined them last week.

LEAVE FOR OUTING Mr. and Mrs. R. H. Corwin and children left today by automobile for Minneapolis, Minn., and the lake region for an outing of a week or ten days.

GUEST OF MISS RAMP Miss Grace Bush of Mitchell, S. D., who has been the guest of Miss Jessie ramp for several days past left yesterday for Homestead, Mont. Enroute she stopped over in Mandan with friends.

TO ATTEND WEDDING Mr. and Mrs. A. O. Gamm and son, Buddy, and Mrs. F. S. Morey will be married tomorrow for Barrett and the Twin Cities, where they will visit for a couple of weeks. While away Mrs. Morey will attend the wedding of her niece, Miss Marion Freiseth and Harry Fowler Friday in St. Paul.

VISITING FORMER HOME Mrs. Frank Simon left this morning to visit with friends in Fargo, and at her former home in Detroit, Minn., for a couple of weeks, while Mr. Simon is assisting in the office of the attorney general.

RETURNS FROM ST. CLOUD Herman Baster of Hazelton, who has been visiting in St. Cloud, Minn., returned last night and was met here by his mother, Mrs. H. O. Baster.

CITY VISITORS Malida Pfeifer of Dogden, and Alma Anderson of Roseau, were city visitors here today.

CITY VISITORS Mike Donehey, Balsich, and M. Jameson, Modie, and Mr. and Mrs. S. Morris of Hazelton, were city visitors here today.

VISITING FARM Mr. and Mrs. Charles Enochsen of 605 Tenth street, left today for a few days visit at their farm near Douglas.

ATTENDING SCHOOL Carl A. Munson of the M. B. Gilman company left today for Fargo to attend the Dodge Brothers School of Instruction.

GUEST OF MISS FLEMING Miss Leota Hendershot left this morning for Fargo to visit for a week with Miss Ethel Fleming.

ATTORNEY-GENERAL George Shafer addressed the Kiwanis club at Mandan yesterday on the personal traits of President Calvin Coolidge.

ON VACATION J. H. Newton, clerk of the supreme court, has gone to Williston for a brief vacation.

RETURN FROM MOUNTAINS Mr. and Mrs. A. W. Snow have returned from the Kildeer Mountains where they spent the week end.

AT GREEN LAKE Mr. and Mrs. John Graham have gone to Green Lake, Spicer, Minn., for a couple of weeks outing.

RETURNS FROM LAKES W. H. Webb returned last night from Detroit, Minn., where he has been visiting with members of his family for the past couple of weeks.

VISITING MRS. COOK Mr. and Mrs. Humphrey Bailey of Wing visited with Mr. Bailey's sister, Mrs. A. W. Cook yesterday.

CALLED AWAY Mr. and Mrs. Sig Helland left last night for Minneapolis, being called by the illness of Mr. Helland's father.

MRS. HARRIS RETURNS Mrs. George E. Harris has returned from Minot where she has been spending the week visiting with friends.

GUESTS AT HARRIS HOME Mr. and Mrs. O. Harris of Granite Falls, Minn., arrived yesterday for a visit at the home of Mr. and Mrs. G. B. Harris.

CITY NEWS

St. Alexius Hospital

Miss Jeanette Slater, Brittin, Master Daniel Smith, Elbowoods, Helen Feist, Strasburg, Miss Pauline Mehloff, Tuttle, Joe Senger, city, Ben Anacker, Blackwater, Miss Ruth Corder, city, Mrs. Charles Enders, Linton, J. P. Wagner, Peter F. Wolf, Hague, Robert Cotton, Wilton, Mrs. Wm. Morey, Voltaire, Mrs. Albert Larson, Kintyre, Mrs. Jake Feist, Strasburg, Miss Elsie Nichanko, Wilton, O. F. Anderson, city, Roy Morris, Linton, Miss Martha Weidelich, Dawson, Mrs. Barbara Walter, city, Theodore Gietzen, Glen Ullin, Master Arthur and Mabel Lande, Moffit, Mrs. D. P. Ericksen, Asley, Miss Ethel Robinson, Washburn, have entered the St. Alexius hospital for treatment.

Mrs. Peter Koppi, Zap, Adolph Schleider, Golden Valley, Frank Gratz, Judson, Mrs. Christina Bechel, Linton, Mrs. John C. Fischer, and baby girl, Glen Ullin. Mrs. Wm. Grossman, city, Mrs. Joseph Meadow, city, Mrs. W. T. Hammel, Hannover, Miss Kathleen Hawk, Miss Pearl Grimm, Napoleon, Elmer Gray, city, Master Harry Stoller, Hazen, Master Elbert Hubbard, Glen Ullin, Rochelle Fleck, Richardson, and Ferdinand Stephens, Napoleon have been discharged from the hospital.

Bismarck Hospital

Philip Heilie, Glen Ullin; John Heilie, Hebron; Mrs. John Schut, Heilie; Miss Olive Clark, Robinson; Mrs. P. J. Wentz, city; Bratina Kettler, Zeeeland; Henry Kettler, Zeeeland; Miss Mae Washburn, Mercer; Mrs. Wm. Schmierer, Linton, have entered the Bismarck hospital for treatment. Mrs. A. M. Freeland, Plaza; Mrs. R. C. Pravitz, Wilton; Mrs. Peter Alby, city, W. E. Sherwood, city; Myrtle Wilton, city; Mrs. Burton Welsh, Wibaux, Mont.; Harold Mount, Baldwin; Miss Martha Grumpe, Hebron, and Mrs. W. J. Godwin, Mandan, have been discharged from the hospital.

Parents of Girl

Mr. and Mrs. C. Selvig of 300 S. Second street are the parents of a baby girl born yesterday at the St. Alexius hospital.

Parents of Boy

Mr. and Mrs. W. J. Wilcox of 212 Broadway are the parents of a son born yesterday at the St. Alexius hospital.

Convalescing Rapidly

L. M. Parsons, who is in St. Alexius hospital, where he underwent a serious operation for stomach trouble several days ago, is reported getting along nicely.

Announce Birth

The birth of a baby girl is announced by Mr. and Mrs. Dralle of Brittin. The child was born yesterday at the St. Alexius hospital.

AT THE MOVIES

CAPITOL

"The Village Blacksmith," a William Fox production, and proclaimed by Broadway critics as a screen masterpiece, will be shown at the Cap-

itol theater Monday. The story is taken from the immortal poem of Longfellow and as in the poem, the father in the picture stands out as the heroic figure.

ELTINGE

Benny Alexander will portray the role of Penrod, in "Penrod and Sam," adapted from the Booth Tarkington's famous novel, which shows at the Eltinge today and tomorrow, Wednesday and Thursday. The joys and sorrows of a typical American boy constitute the plot of the picture.

VERMONTERS PLAN COOLIDGE CLUBS

Grafton, Vermont, Aug. 22—Approximately 150,000 former residents of Vermont, now voting in 47 other states, are actively supporting a national movement to organize and enlarge Coolidge-for-president clubs.

John Barrett, former director of the Pan-American Union, announced yesterday on his return home from Washington and New York.

In a formal statement, Mrs. Barrett, who conferred with President Coolidge on his return home from

Washington and New York.

Several of the notables of the

American tribes have announced

their support of Albania for admission

Social and Personal

Fortnightly Club Women to Study Mysterious East

Those mysterious countries called "The Near East" will be studied by members of the Fortnightly club during the coming club season. As a protection and to prevent misunderstanding of the countries including Syria, Mesopotamia, Armenia, Turkey, Greece, and Persia were selected as the most representative and the ones which the women wished to study. The club's new program is worked out in such manner as to include the most important phases of the subjects included in the program.

At the first meeting of the season, September 26 Mrs. W. L. Nussell will discuss "Who are the Turks?" This will be followed at the later meetings with such leading subjects as "Syria—Biblical and Modern," "Mesopotamia—Old and New," "Armenia and the Armenians," "Greece—Its Relationship to the Near East," "Persia," "The Balkan Wars," "The Dardanelles," "The European War—1914-18," and "Treaty of Versailles and Lausanne Conference."

After a study of the geographical significance of the various countries and their historical development the development of their educational system and religions will be taken up in its various phases. Various movements will be taken up later and some of the outstanding characters as Mustapha Kemal Pasha and prominent women.

A feature of the winter program will be a debate "The Turk vs. the Armenian" in which Miss Minnie J. Nielson, Mrs. F. L. Conklin, Mrs. A. M. Brandt, and Mrs. A. M. Christianson will affirm and defend various sides. The cities which have figured so prominently in news dispatches about battles and movements, Constantinople, Aleppo, Beirut, Smyrna, Salonika, and Angora will be examined at one of the meetings.

Arrangements of the program for the year were in the hands of Mrs. F. R. Smyth Mrs. R. Worth Lumry, and Mrs. William Langer. While Miss Alma K. Kier, missionary in the Near East, was visiting in Bismarck during the summer she was consulted in regard to the selection of certain of the topics. It is expected that during the club season various speakers who have had the opportunity of residing or visiting in the Near East will address the club members.

STRAUSS FAMILY RETURNS
Dr. and Mrs. F. W. Strauss and family returned last night from Green Lake, Spicer, Minn., where they have been spending the summer at their summer home. Dr. Strauss and daughter returned on the train while Mrs. Strauss and the other members of the family returned by automobile. Frederick Strauss made the 427 miles from the lakes by automobile in time to meet his father at the station. L. W. McLean and son, Lester, who have been visiting at the Strauss home accompanied them home. Mrs. McLean preceded them by a few days.

VISITORS TO ATTEND WEDDING.
Mrs. J. A. Reed and daughter, Miss Jane, of White Bear, Minn., formerly residents of Jamestown, who have been visiting at the home of Al Foster and family of near Wilton and Mr. and Mrs. F. C. Ellsworth and Thomas Hall of the city left today for Kildeer and Dickinson, where they will visit with friends.

VISITING SISTER.
Mrs. Marion Whitestone of Seal Lake, Wash., who has been visiting with her sister, Mrs. F. S. Morey for the past month left last night for St. Paul, Minn., to attend the wedding of her niece, Miss Marion Frelseth and Harry Fowler Friday in St. Paul.

VISITING FORMER HOME.
Mrs. Frank Simon left this morning to visit with friends in Fargo, and at her former home in Detroit, Minn., for a couple of weeks, while Mr. Simon is assisting in the office of the attorney general.

Simple Summer Slipovers Showing New Lines

COPYRIGHT BY MC CALL'S

Every summer has its slipovers and those of this season are no less attractive than the ones we wore last year. Simple as they are, though, there's not one but shows the influence of new lines. No garment is too simple to be fashionable.

Notice the low-busted bodice of one of the models reproduced—the wide belt fitting snugly around the hips. An inverted pleat outlined with stitching forms a full length front panel on another. A third has top and bottom stitched together in the same zig-zag line as that used for chemise frocks.

Long and short sleeve blouses are worn with these sleeveless dresses and they may be tailored or frilly as one prefers.

RETURNING HOME
Mrs. F. A. Schroeder and daughter, Miss Lillian left this morning for their home at Grand Forks. Mrs. Schroeder recently underwent an operation at the Bismarck hospital, and Miss Lillian is a graduate of the nurses training school. Enroute the girls will stop in Valley City to visit with Mrs. A. Eckel.

GUESTS OF MISS EASTON

Harry F. Easton and son, Ralph and Miss Genevieve Easton of Tioga stopped over here yesterday with their sister, Miss Lucille Easton. Mr. Easton and Miss Easton are enroute to their home after visiting in Minneapolis, Minn.

MRS. VAN HOOK RETURNS

Mrs. L. Van Hook returned last evening from a two weeks vacation trip with relatives in Michigan, Illinois, and Kansas. In Detroit she visited with her daughter, at Topeka, Kans., with two sisters and with a niece at Leavenworth, Kans., and in Chicago with two brothers.

GUESTS OF MRS. HENDERSHOTT

Mrs. S. G. Larabee and daughter, Miss Muriel of St. Paul, Minn., are guests at the home of Mrs. Larabee's aunt, Mrs. Catherine Hendershott for a few days.

RETURN HOME

Mrs. A. W. Cook and daughter, Misses Nana and Mary who have been visiting with relatives and friends at Regan and Wing for the past week returned home yesterday.

BIRTHDAY SURPRISE.

Dr. A. W. Munson was pleasantly surprised last evening by a number of friends when they appeared at his home to help him celebrate his birthday. The visitors spent the evening in playing games and a birthday luncheon in which the large birthday cake occupied a place of honor on the table. Bouquets of sweet peas formed a center piece on the dining room table. The guests departed after wishing Dr. Munson happiness and presenting him with remembrances of the happy occasion.

RETURN FROM BLACK HILLS.

Mr. and Mrs. A. Patient, Mrs. Viollet Altman and Miss Adele Kauffman, who have been enjoying a vacation trip in the Black Hills, returned last night.

John Ozmun of Wilton, was a city

TO VISIT MISS PEARCE.

Miss Kathryn Welch of Philadelphia, Pa., is expected to arrive Sunday to visit for a few days with Miss Hazel Pearce. Miss Welch, a teacher of domestic science, has been spending her vacation in Spokane and Seattle, Wash.

RETURN FROM LAKES

Mr. A. J. Arnott of Bismarck and Mrs. Charles Howe of Wilton who have been visiting with their mother at LeRoy, Minn., and Detroit lakes for the past three weeks returned yesterday. Mr. Arnott and Mr. Howe joined them last week.

LEAVE FOR OUTING

Mr. and Mrs. R. H. Corwin and children left today by automobile for Minneapolis, Minn., and the lake region for an outing of a week or ten days.

GUEST OF MISS RAMP.

Miss Grace Bush of Mitchell, S. D., who has been the guest of Miss Jessie Lamp for several days past left yesterday for Homestead, Mont. Enroute she stopped over in Mandan with friends.

TO ATTEND WEDDING.

Mr. and Mrs. A. O. Omelt and son, Buddy, and Mrs. F. S. Morey will leave tomorrow for Barrett, and the Twin Cities, where they will visit for a couple of weeks. While away Mrs. Morey will attend the wedding of her niece, Miss Marion Frelseth and Harry Fowler Friday in St. Paul.

VISITING FORMER HOME.

Mrs. Frank Simon left this morning to visit with friends in Fargo, and at her former home in Detroit, Minn., for a couple of weeks, while Mr. Simon is assisting in the office of the attorney general.

Parents of Girl

Mr. and Mrs. O. Selvig of 300 S. Second street are the parents of a baby girl born yesterday at the St. Alexius hospital.

Parents of Boy

Mr. and Mrs. W. J. Wilcox of 212 Broadway are the parents of a son born yesterday at the St. Alexius hospital.

Convalescing Rapidly

L. M. Parsons, who is in St. Alexius hospital, where he underwent a serious operation for stomach trouble several days ago, is reported getting along nicely.

Announce Birth

The birth of a baby girl is announced by Mr. and Mrs. Dralle of Britton. The child was born yesterday at the St. Alexius hospital.

AT THE MOVIES

CAPITOL.
"The Village Blacksmith," a William Fox production, and proclaimed by Broadway critics as a screen masterpiece, will be shown at the Cap-

RETURNS FROM ST. CLOUD.
Herman Batzer of Bismarck, who has been visiting in St. Cloud, Minn., returned last night and was met here by his mother, Mrs. H. O. Batzer.

CITY VISITORS.
Malida Pfeifer of Dogden, and Alma Anderson of Roseglen, were city visitors here today.

CITY VISITORS.
Mike Dobney, Raleigh, and M. Jameson, Moffit, and Mr. and Mrs. S. M. Olvis of Hazen, were city visitors today.

VISITING FARM.

Mr. and Mrs. Charles Enchsen of 608 Tenth street, left today for a few days visit at their farm near Douglas.

ATTENDING SCHOOL.

Carl A. Munson of the M. B. Gilman company left today for Fargo to attend the Dodge Brothers School of Instruction.

GUEST OF MISS FLEMING.

Miss Leota Hendershott left this morning for Fargo to visit for a week with Miss Ethel Fleming.

SPKES ON COOLIDGE.

Attorney-General George Shafer addressed the Kiwanis club at Mandan yesterday on the personal traits of President Calvin Coolidge.

ON VACATION.

J. H. Newton, clerk of the supreme court, has gone to Williston for a brief vacation.

RETURN FROM MOUNTAINS.

Mr. and Mrs. A. W. Snow have returned from the Kildeer Mountains where they spent the week end.

AT GREEN LAKE.

Mr. and Mrs. John Graham have gone to Green Lake, Spicer, Minn., for a couple of weeks' outing.

RETURNS FROM LAKES.

W. H. Webb returned last night from Detroit, Minn., where he has been visiting with members of his family for the past couple of weeks.

VISITING MRS. COOK.

Mr. and Mrs. Humphrey Bailey of Wing visited with Mr. Bailey's sister, Mrs. A. W. Cook yesterday.

CALLED AWAY.

Mr. and Mrs. Sig Helland left last night for Minneapolis, being called away by the illness of Mr. Helland's father.

MRS. HARRIS RETURNS.

Mrs. George B. Harris has returned from Minot where she has been spending the week visiting with friends.

GUESTS AT HARRIS HOME.

Mr. and Mrs. O. Harris of Granite Falls, Minn., arrived yesterday for a visit at the home of Mr. and Mrs. G. B. Harris.

CITY NEWS

Stauffer Faces Murder Charge in District Court.

Minneapolis, Aug. 22.—Wm. Stauffer, alleged slayer of Patrolman Engstrom of Minneapolis today pleaded not guilty to an indictment charging him with murder in the first degree and trial was set for Sept. 10, when he will be arraigned in Hennepin district court.

Minneapolis, Aug. 22.—Handcuffed to a detective and closely guarded by others, William Stauffer, slayer of Patrolman Emil Engstrom, was brought into district court late yesterday and his arraignment on an indictment charging first degree murder set for today instead of yesterday on a plea of counsel that he had not had time to confer with the defendant.

The grand jury, which earlier in the day returned the murder indict-

ment against Stauffer, later voted another indictment charging assault in the first degree for the shooting and wounding of L. W. Taylor, taxicab company president.

Stauffer shot the two men last week when Engstrom tried to arrest him.

Roumanian Prince To Ascend Throne

Valona, Albania, Aug. 22.—The support which Albania is receiving from Roumania for admission to the Little Entente at the conference at Sinaia, in Roumania, has given new impetus to the candidacy of Prince Nikolai of Roumania for the throne of Albania, which the Prince of Wied vacated at the beginning of the world-war.

Several of the notables of the Albanian tribes have announced their support of Prince Nikolai's aspirations, on the ground that a relationship with the Roumanian court would greatly assist Albania to achieve its reconstruction.

Prince Nikolai is the younger son of Queen Marie of Roumania, and is once removed from the Roumanian throne by his brother, Prince Carol, the eldest son. It is known that Queen Mary is backing her younger son's endeavors to become prince of Albania.

Knight was held under four indictments, two counts under each, and was sentenced to two years on each indictment to run concurrently.

He had refused to plead and was held in the Cass county jail in default of \$8,000 bonds until his case could be taken care of at the next term of court. Yesterday he decided to plead guilty to the charge.

The four indictments were for driving four stolen Cadillacs cars from Minneapolis to points in North Dakota.

Knight is also wanted by the Hennepin county authorities on a similar charge.

PROBLEMS UP TO FARMERS

Must Solve Them Themselves,

Says Bishop Wehrle

Milwaukee, Wis., Aug. 22.—That the farm problem will have to be solved by the farmers themselves, was the feature of an address on the farm situation delivered by the Rev. Virgil Wehrle, bishop of the German Catholic Central society.

Giving examples from his experience as a priest in North Dakota, for more than 35 years Bishop Wehrle criticized speculation in the wheat market.

Bishop Wehrle said that it is not the function of the state to control industry.

The farmers themselves must learn to plant less grain and to rely more upon mixed farming," he continued.

BOY WIZARDS

A wonderful boy astronomer lives in Athens, Greece. He is William Nelson Abbott, 16 years old.

This lad was the first to make the discovery, some weeks ago, that the star Beta Ceti had "flamed up" to the extreme brilliancy known as "start of the first magnitude."

Astronomy has been his hobby since he was 11. And it is so far advanced in this great scientific field that he has been given honorary membership in the Societe Astronomique de France and the Association Francaise des Observations d'Etapes Variables of Lyons.

Young Abbott is descended from an Englishman who went to the Near East as a Crusader, centuries ago, and settled in Greece. That ancestor certainly would have been dumfounded if he could have known that one of his descendants would be such a boy prodigy at astronomy. That's the great fascination of parenthood—the uncertainty as to our descendants, their mentality and careers.

Abbott made his discovery, about the star Beta Ceti, with his naked eye. Then, he says:

I went to the telescope to compare Beta with the star Aldebaran, which is taken as a unit, and found that Beta had increased in brilliancy more than three magnitudes. I determined the star's position on a chart and telephoned to the Athens Observatory, where it was said that nothing had been observed.

I telegraphed next day to M. Flammarion, the astronomer in Paris.

Flammarion checked the lad up, found he was right.

You recall the Polish boy chess wizard. On his heels comes this lad in Greece, apparently destined to be one of the world's greatest astronomers, possibly the leader.

Margaret Maguire, Philadelphia educator, originator of schools for backward pupils, tells about a boy who came under her observation. He seemed to be the champion dumb-bell, half-asleep and disinterested in the subjects that the teachers brought to his attention.

"Then," says Miss Maguire, "some one happened to mention radio. And the boy stood up and began to lecture on radio in technical terms that amazed the teachers."

That boy had, born in him, the scientific intellect that is characteristic of the rising generation. When a grown-up hears some of these knee-trousers lads talking about radio—well, it rather makes him feel that the older generation belongs to an obsolete period.

The world is entering a great scientific age. The rising generation reveals that, clear-cut, unmistakably.

HOME AGAIN

Well, folks, how did you enjoy your vacation this year? It's getting to be a common saying, about coming home to rest up from vacation.

Home looks better than any place on earth, after we have been away from it for awhile. The truest expression in our language, or any other, is: "No place like home."

One family returning from vacation have had a great trip, playing gypsy in a flivver, camping on the way and taking their time about it. Father had some good fishing, and at various stops he settled the affairs of the world with other ramblers, fellow-gypsies. Mother, of course, had more work than at home, what with keeping track of her flock, but that's in the order of things, she expected it. The children were the only ones that had a real vacation.

No place like home.

The second big thought that occurs to all of us, when we get back home to running water and soft beds and conveniences such as daily mail, is that we are slaves to Father Time.

Fifty weeks of the year, most of us toil.

Two weeks we have for vacation—for relaxation, diversion and recreation—a paltry, miserly pittance in which we are expected to recuperate ourselves sufficiently to be strong enough to "stand the gaff" for another year.

Many of us—more than will admit it—really work harder during vacation time than we do during the balance of the year. But we enjoy it, because the labor is not compulsory. An ideal sort of civilization would be one in which no one would work unless he had to. Work then would be fun, nearly every one would want to.

Civilization's goal seems to be to escape from compulsion. That's the Vacation Spirit.

DOLLAR'S VALUE

The dollar is worth only 65 cents now, on the 1913 basis, says Professor Irving Fisher. He means that \$1 now will, on the average, buy only as much as 65 cents bought in 1913. He has wholesale markets in mind. But the situation is almost identically the same when it comes to retail prices—cost of living.

This is a sad blow to the man who saved dollars in 1913 and now finds them worth only 65 cents apiece. But there's no use getting discouraged. For the rule is beginning to work in the opposite direction—the 65 cents saved today will be worth \$1 later, in buying power. You'll realize this, in full, about 1950. Far off? It'll be here before you realize—and it'll come when most of us will need the money more than at any time in life.

PULL!

How powerful is this horse? How much can he haul? These questions have been pondered millions of times by farmers in almost countless generations, prior to a horse trade or purchase.

The pulling power of horses has always been more or less a matter of guesswork. Not any more. Davidson and Collins, professors at Iowa Agricultural College, invent a hydraulic wagon that registers exactly what a horse can do in harness.

The idea is so simple it's a wonder someone didn't think of it before. That's the way with an almost infinite number of other useful and profitable devices waiting to be discovered.

Editorial Review

GRATIFYING BUT USELESS

Newspaper dispatches that depict the State owned flour mill at Grand Forks grinding at full capacity to fill orders, are gratifying.

But there existed no situation that called for the investment of several millions of dollars of public funds and the pledging of the state's credit for more millions, simply to supply flour to a hungry populace. Private mills have always met the demand in the past, and they would be meeting the demand today had the state mill not been built.

The mere fact that the state mill is grinding 24 hours a day doesn't justify the State's investment in the property, or the hazard to which the State is subjecting itself in the operation of the property.

Only when the mill affects grain and flour prices will it meet up with the expectations of its sponsors, who insisted that the State, by engaging in the milling business, could increase the price of wheat and decrease the price of flour.

That happy time seems just as remote now as it did when the soap boxers were so industriously publicizing the glories of "The New Deal."—Fargo Forum.

HOW TO SAVE

Saving money is like everything else that counts and that puts people ahead.

Seven out of ten people are spending, with a vague hope that something like a stroke of lightning out of a clear sky will bring them fortune—which never happens—and wondering how some others manage to lay by somethings. And the others are not wondering how people manage to save, not spending all they can get their hands on and waiting for the sky to rain larks but they are saving.

Which explains why fewer succeed than fail, why fewer are rich than are poor.

For the only way to save is to save.

The average individual with an eye to saving money against adversity or old age will plan out a budget taking care of what he thinks are his needs. with an idea of leaving a margin for savings. When it is attacked that way there is no margin, and therefore no saving.

That process should be reversed.

The saving should be put first. The individual should decide what he ought to be saving, and then take out and put it on the main balance sheet and get along on the main balance sheet.

He can do it; if he tries he will do it. He would do it if his income were reduced that much.

He would because he had to. If he takes his income for his savings account and then pretends his income has been reduced that much, he will save. And most people will save in no other way.

Those who are waiting until there is a surplus to be saved never will reach that point no matter how great their income may grow; because those who plan that way have a fatal habit of letting their wants expand at a slightly faster rate than their income grows.

The only way to save is to save.

Duluth Herald.

ADVENTURE OF
THE TWINS

By Olive Roberts Barton

EVERYBODY in Pee Wee Land was very busy. It was washing day for Mrs. Tiny Mite, ironing day for Mrs. Upsetday (who had washed the day before), baking day for Mrs. Fry (who had her washing and ironing all done and put away) and cleaning day for Mrs. Jumper.

Every single Pee Wee was busy—King Snookums and his lord high chancellor.

But one person wasn't as busy as he should have been. Or rather he was busier than he should have been—for he was going to do something that he wasn't allowed to do. And he was sneaking off without anybody seeing him.

That person was Winky Wank Pee Wee.

He slipped out of Pee Wee Land, and skedaddled across the daisy patch and crept across the sasspatch garden to the porch of Farmer Brown's house, where a lovely vine with smelly flowers shaded it from the sun.

The next thing Winky Wank did was to climb the vine like a steeple-jack and when he crawled half way up he slipped into one of the smelly flowers and waited.

By "n" there came a buzzing. Pretty soon the buzzing stopped.

It was Mister Bee, and he had stopped on the very posy where Winky Wank was hiding. Winky Wank winked at himself and watched his chance.

When Mister Bee was busy drinking up honey juice, didn't the little Pee Wee boy give a spring and land right on Mister Bee's back!

And Mister Bee was so surprised that he almost lost his balance for a minute.

But he didn't lose it—quite—and the next minute he was flying away and buzzing like eleven airplanes. He usually only buzzed like one airplane but he was so angry about Winky Wank stealing a ride that he turned on every buzz he had.

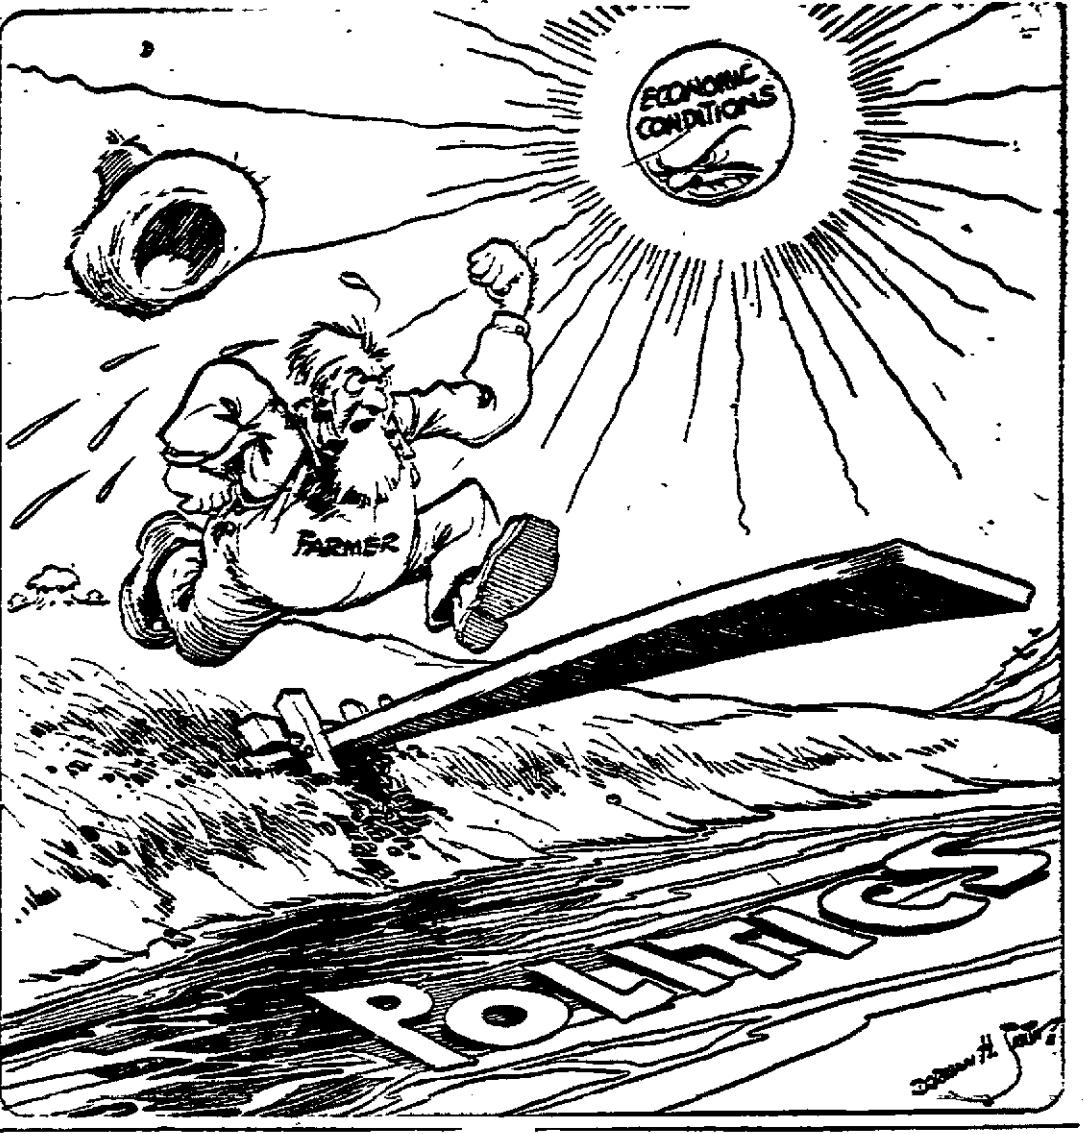

"Now I'm an aviator!" cried Winky Wank, waving his cap with one hand while he held onto Mister Bee with the other. "I've always wanted to ride a buzz bee, but mother wouldn't let me. Hurrah!"

What happened then I'll tell you tomorrow.

DRIVING HIM IN

LETTER FROM PRISCILLA BRADFORD
FORD TO JOHN ALDEN
PRESCOTT.

My Dear Mr. Prescott: I am writing this without the knowledge of your dear mother, but I think it is not only right but important that you should know that your mother is in a very serious condition.

For the last few days she has refused all food except the bones of chicken or some other nasty morsel with which I have tried to tempt her.

I took the liberty of telling her that I know you did not understand about it, that you were not heartless nor thoughtless, even though you had married a modern girl or rather a girl with all the modern tendencies toward excitement and frivolous living.

I did this because I have come to the slow but sure conclusion that unless something can be done to clear up this misunderstanding between you and your mother, you will not have her in the land of living long.

Will you please receive my kindest inquiries as to the state of Mrs. Prescott's health and believe me always.

Yours very truly,
PRISCILLA BRADFORD.
Telegram from John Alden Prescott to Priscilla Bradford.

Letter received and contents noted.

JOHN ALDEN PRESCOTT.

Colored globes in chemists' windows were first displayed by Moorish druggists of Ar-bia and Spain.

First letter ever typed was written by your mother seems to be very ten in 1830.

Boston man broke a robber's nose. Never stick your nose into other people's business.

Yours very truly,
PRISCILLA BRADFORD.

Two New York crooks who had no etiquette books slapped a girl's face and took \$4264.

The world gets better. French haven't enough oil for a war.

Autos are so scarce in parts of Mexico, Jose Silva of Mazatlan has lived 122 years.

The watermelon crop is short. This is verified by statistics and by dry cleaners.

Hewitt rose to his feet, the other following suit.

"Someone's been pulling your leg," he told him. "Chard Bromley's all right. I happened to see his credentials myself, and they were perfectly in order. He's talking about arranging a gigantic house-warming by the by, in the bungalow he late manager never lived to see completed. I suppose everybody who's anybody'll be there."

Pennington affected surprise.

"You going, Jack?"

"I don't see why not," said the Commissioner.

"And Monica?"

"She's pretty keen on the notion."

They left the clubhouse and descended the steps that led to the door. Dawson and Gwynne walked in front.

"Bromley's area's still restless," said Pennington after a prolonged pause. "If he raided the estate while you were dancing, Chai-Hung's stand a fair chance of bagging every important functionary in Borneo."

Hewitt laughed.

"Twenty or thirty whites would give your friend a decent warm reception. I'm not forgetting the Yellow Seven and I'll make it my business to insure nobody goes empty-handed."

Captain John Hewitt stretched himself wearily, pushed from in front of him the documents at which he had been working after dinner, and strolled out on to the veranda.

Both the living room and the veranda were deserted. He cast a quick glance round him and remarked that one of the most comfortable chairs was missing. Thirty seconds later he had succeeded in tracing the dim outline of the missing piece of furniture—not a dozen steps from the foot of the steps. A single glowing spot—accentuated against the blackness—indicated that the chair was occupied.

Hewitt went down.

"That you, Pete?"

The pleasantly contralto tones of Eadie replied to him.

"No, it's I, Captain Hewitt. The others have gone down to the coast. Mrs. Viney was anxious to discover how the native fishermen spiked fish."

He took the flight at a couple of strides and, selecting a wicker stool, placed it in the immediate proximity of Miss Bromley.

(Continued in Our Next Issue)

The country bedbugs have enjoyed their vacations on city people very much this summer.

New York cop arrested a boot-legger. Sounds like a case of mistaken identity to us.

Save your Palm Beach and Seerucker suits. You can wear them for underwear this winter.

Don't break up your mosquito netting. Your wife can make her winter dress.

Old straw hats make the cows give better milk.

We will have nutting parties soon, after nut coal.

Insects which live on vegetable foods are slow, and inoffensive, while those which feed on animal substances are active, pitiless and quarrelsome.

Gambling on rainfall is popular in India, where paid watchers keep a lookout for rainclouds and warn "speculators" to make their bets.

THE YELLOW SEVEN.
The Barrier

Of Fire

By Edmund Snell

NEA Service, Inc. 1923

BEGIN HERE TODAY

Captain John Hewitt, Commissioner of Police at Jesselton, British North Borneo, has as guest Enid Bromley, daughter of Chard Bromley, manager of the Borneo-Borneo rubber estate. Peter Pennington, engaged by the government to apprehend Chai-Hung, leader of The Yellow Seven, a gang of Chinese bandits, loves Enid's sister, Monica Viney. Jocelyn Gwynne comes to Jesselton and tells Pennington that he knows Chard Bromley and that Bromley has no daughter.

There was something about Enid Bromley that was far more intoxicating than the contents of the decanter.

"That was really very nice of you," Hewitt continued to respond. "I'm sorry you missed the show on my account. It's quite an interesting spectacle."

"The light is—Mr. Blackman jabs his spear into it."

The girl laughed.

"Couldn't we go tonight?"

"Certainly, if you're not too tired.

SPORTS

REDS BLOWING HOT ON TRAIL OF M'GRAWMEN

Beat Philadelphia White
Giants Are Being Trimmed
By Philadelphians

(By the Associated Press)

Chicago, Aug. 22.—The New York Nationals could feel the Reds' breath coming hot on the backs of their necks as they started on the race toward the world series late yesterday. The world champion lost, 9 to 5, to Pittsburgh, after using four pitchers without effect. The Pittsburgh batters took five runs in the fifth inning and held their lead throughout.

While this was going on in New York the Reds won in Philadelphia by a score of 7 to 5, and climbed up a full game. They now are just three and a half games behind the losing leaders.

In Boston the St. Louis Nationals bucked it against Cooney in the sixth and Oeschger in the ninth, defeating the New Englanders, 8 to 2. Hornsby made a pair of two-baseers.

The Robins lost again in Brooklyn when the Chicago Nationals landed hard on Dazzy Vance's delivery. Dazzy was exceedingly good in spots, striking out nine men but the Chicago swatters seemed to find him often. Dutch Henry, who pitched the ninth inning, let in five runs.

The Chicago-New York and the St. Louis-Washington games were prevented by rain.

Rain prevented all scheduled games in the American League.

WRESTLER IS READY FOR FALL BOUTS

Stanley Rodgers, Bismarck light heavyweight wrestler, is taking a vacation at Bemidji, Minnesota, he writes The Tribune. He is training every day, he says, and when he comes back to Bismarck about the 25th he expects to be in fine shape for his fall wrestling campaign.

Clarence Abrahamson of Kathryn, N. D., also writes The Tribune, saying that he has just returned from a trip through southern Minnesota where he met George Halverson, Grappling Brown and James Grattan, winning all three wrestling matches.

Abrahamson wants a match with Thor Jenson, local middleweight wrestler. Abrahamson says he chins the bar thirty times each morning for a little exercise.

Theatres Feature Feminine Pugilists

Berlin, Aug. 22.—"Lady boxers" are star attractions at the cheaper variety houses in Berlin, and attract many tourists to these places of amusement. There are several groups of women pugilists which spar in various cabarets and music-halls, and they box with great vigor.

One of the best-known female boxers has a nose which is badly deformed from having been broken, and another has a cauliflower ear.

Most of the female pugilists are young and extremely active. They are about as scientific as many of the men who pose as professional boxers, for the art of boxing is not highly developed in Germany.

TEAM'S IN CELLAR BUT HE ISN'T DOWN-HEARTED

Fletcher Blames Poor Fielding, and That Only, For Phillies Poor Showing This Year

BY BILLY EVANS.

Philadelphia, Aug. 22.—Few managers are encouraged with a seventh place ball club, but Arthur Fletcher of the Philadelphia Nationals is an exception.

From the low position of the Phillies one gets a picture of a disorganized, dissatisfied collection of ball players. But quite the contrary is the condition in Art Fletcher's family, and Fletcher, at present is seeing daylight for the first time in his managerial career.

The main difficulty with the Phillies, in Fletcher's opinion, has not been weak pitching as has been reported by the judges of the press box. Far from that. It has been a weak defense on the left side of the infield.

In the first place, it must not be forgotten that Fletcher had to piece together his infield from a rather motley collection. He has Walter Holke, last year with Boston, at first; started with Parkinson and now has Cotton Tierney, formerly with the Pirates, at second; Heine Sand, last season with Salt Lake, at short, and third base has been turned over to Wrightstone.

Weak Defense Fatal.

Up until this season these four had never played together before.

"We may look bad where we are," remarked Fletcher the other day, "but don't judge everybody by their looks—particularly this ball club."

"Not exaggerating, I know of at least 15 games that were lost through weak fielding around the left side of the infield—games, let me tell you, that we had won and were lost by the one field slip."

"We had the Giants beaten in six games this season closing the seventh inning and lost them down the stretch. Figures will support my talk. Can't beat that for rough luck—whipping the world champions right down to the stretch and then losing."

DAVIS TENNIS TEAM CHOSEN

New York, Aug. 22.—The American team that will defend the Davis cup, international team tennis trophy, will be composed of R. Norris Williams, II, of Philadelphia, captain; William T. Tilden, II, of Philadelphia, national champion; William M. Johnston, of San Francisco, world's champion, and Vincent Richards of Yonkers, N. Y.

This team, which will oppose Australia, survivor of the 1923 pre-liminary play, in the challenge round at Forest Hills, N. Y., August 31, September 1 and 3, is the same as that which successfully defended the historic trophy against the anti-peans last year. The selection was made late yesterday by the Davis cup committee of the United States Lawn Tennis Association of which Julian S. Myrick, of New York, is chairman.

Readers Want Adventure Stories

Chicago, Aug. 22.—The summer-time reader would rather have a true account of pirates or shooting seas in the Arctic than even a love-story, declares Nathan R. Levin, assistant librarian of the Chicago Public Library, who has been studying the tastes of the general reader for years.

"That does not mean that the love-story has become unfashionable," Mr. Levin added. "It means rather that at vacation time everybody temporarily forgets his desire to get on in his own business or personal affairs and prefers to read about cinnamon-colored savages of the South Seas or trapping wombats in the winds of Australia."

WOOD SHADES.

The wood shades, flame and blending metallic hues will be used in evening gowns this fall.

LONG GLOVES.

Since short sleeve dresses are being featured for fall wear, the long glove is expected to lead in demand for hand covering. Colors most stressed will be various shades of brown.

EMBROIDERIES.

Interesting embroideries, executed

in ribbon are seen on many of the fall frocks. One frock shows the low waist line emphasized by a belt made of gold or silver.

Dr. E. S. Riggs is penetrating the unknown interior of Argentina, in search of prehistoric animals, declared by scientists to be a most perilous task. The investigator has to face hostile tribes, irresponsible workmen and the danger of climbing precipitous cliffs in search of specimens. Sometimes he must employ a small army to bring back his finds.

Dr. Berthold Laufer, curator of the department of anthropology, is penetrating southern China in an effort to discover the century-old secrets of that land. He will make a study of the language and culture of strange aboriginal tribes said to have been able to travel into the island's fastnesses by automobile with the greatest ease.

Dr. J. Allen Mason is in Colombia, where he has been studying the ancient civilization of that land, thought to have been destroyed centuries before the coming of the Spaniards.

Another party is headed by Dr. W. H. Osgood, who will return soon from Peru and Chile, where he has been collecting rare tropical birds.

Fights Injunction

Puzzling Plays

By BILLY EVANS

THE PLAY

A few years ago two unusual plays came up on the Detroit American League grounds.

Ground rules were in vogue. An overflow crowd caused ropes to be stretched in front of the right field bleachers. Balls hit into such territory were good for two bases.

In one game a hard hit line drive struck in front of the ropes to bound over the heads of the spectators back of the ropes and went into the bleachers, without coming in contact with any person or thing on restricted territory.

Later, a ball was hit a fly ball which struck in the territory back of the ropes. It then bounded into the bleachers. Both plays appeared identical, yet different rulings were rendered in each case. The second hit was the longer.

What would have been the proper ruling?

THE INTERPRETATION

In the first play the proper ruling would have been to allow the batsman a home run, which the umpire did. The ball struck on playing territory in front of the ropes and then bounded over the crowd into the bleachers, making such a hit a home run.

In the other the batsman was granted two bases as covered by the ground rule, even though the hit was a longer drive than the other one.

In the second case the ball struck the ground back of the ropes, in territory restricted to two bases. The moment it struck the ground in

MISCELLANEOUS

A FULL STOCK of hardware and implements, inventory about \$6,000, located in county seat, with large territory and good trade, agents for International lines for past ten years. Health conditions reason for present conditions.

The closing hour was advanced from 1 o'clock, and certain dance days were cut out as a "sign of mourning" at the time the Ruhr was occupied. The papers protest vigorously against a continuance of the present conditions.

Witness The Honorable Andrew Miller, Judge of the said court, and the referee, at Bismarck, in said district, on the 15th day of August, A. D. 1923, on reading the Petition for Discharge of the above-named Bankrupt, it is

Ordered by The Court, that a hearing be had upon the same on the 16th day of October, A. D. 1923, before the said court, at Fargo, in said district, at ten o'clock forenoon; and that notice thereof be published in Bismarck Tribune, a newspaper printed in said district, and that all known creditors and other persons in interest may appear at the same time and place and show cause, if any they have, why the prayer of the said petitioner should not be granted.

And it is further ordered by the court, that the referee shall send by mail to all known creditors, copies of said petition and this order, addressed to them at their places of residence as stated.

Witness The Honorable Andrew Miller, Judge of the said court, and the referee, at Bismarck, in said district, on the 15th day of August, A. D. 1923, on reading the Petition for Discharge of the above-named Bankrupt, it is

(SEAL OF THE COURT) J. A. MONTGOMERY, Clerk.

By JOAN GESTON, Deputy Clerk. 8-22-1w

DECISION OF SUPREME COURT

From Burleigh County

State of North Dakota, ex rel. E.

A. Hughes and Hughes Electric

Company, Relators, Plaintiffs and

Appellants, vs. Frank Milkhan, C.

W. McDonald and W. H. Stutsman,

Board of Railroad Commissioners of

the State of North Dakota, and as

such members of such Board of Rail-

road Commissioners of the State of

North Dakota, Defendants and Re-

spondents.

SYLLABUS:

1. The Public Utilities Act (Chapter 192, Laws 1919) provides for a judicial review upon both law and facts of all orders made by the Board of Railroad Commissioners, fixing, establishing or changing rates.

2. For reasons stated in the opinion it is held that the Public Utilities Act, conferring upon the Board of Railroad Commissioners authority to conduct certain inquiries and make orders relating to public utilities, is not void as vesting legislative or judicial powers in administrative of-

ficers.

3. A litigant can be heard to question the validity of a statute only when, and in so far, as it is applied to him disadvantage.

Appeal from the District Court of Burleigh County, Jansomius, J.

The relators appeal from an order sustaining a demurrer to the complaint.

Affirmed.

Opinion of the Court by Christian-son, J.

Nuessle and Johnson, JJ., disqual-

ified did not participate; District

Court Judges Cooley and Burr, sit-

ting in their stead.

Ed. B. Cox, Bismarck, N. D. and

Divet, Holt, Frame & Thorpe, Fargo, North Dakota, Attorneys for Appel-

lants.

Geo. F. Shafer, Attorney General

and John Thorpe, assistant attorney

general, Attorneys for Respondents.

A FULL STOCK of hardware and implements, inventory about \$8,000, located in county seat, with large territory and good trade, agents for International lines for past ten years. Health conditions reason for present conditions.

THE BISMARCK TRIBUNE

THE OLD HOME TOWN

DECISION OF SUPREME COURT

From Burleigh County State of North Dakota, ex rel E. A. Hughes, and Hughes Electric Company, Relators, Plaintiffs and Appellants, vs. Frank Miholjan, C. W. McDonnell and W. H. Stutsman, Board of Railroad Commissioners of the State of North Dakota, and as such members of such Board of Railroad Commissioners of the State of North Dakota, Defendants and Respondents.

SYLLABUS: 1. The Public Utilities Act (Chapter 192, Laws 1919) provides for a judicial review upon both law and facts of all orders made by the Board of Railroad Commissioners, fixing, establishing or changing rates.

2. For reasons stated in the opinion it is held that the Public Utilities Act, conferring upon the Board of Railroad Commissioners authority to conduct certain inquiries and make orders relating to public utilities, is not void as vesting legislative or judicial powers in administrative officers.

3. A litigant can be heard to question the validity of a statute only when, and in so far, as it is applied to his disadvantage.

Appeal from the District Court of Burleigh County, Jansons, J.

The relators appeal from an order sustaining a demurrer to the complaint.

Affirmed.

Opinion of the Court by Christianson, J.

Nuessle and Johnson, JJ., disqualified did not participate; District Court Judges Cooley and Burr, sitting in their stead.

Ed. B. Cox, Bismarck, N. D. and Divet, Holt, Frame & Thorpe, Fargo, North Dakota, Attorneys for Appellants.

Geo. F. Shafer, Attorney General and John Thorpe, assistant attorney general, Attorneys for Respondents.

BANKRUPT'S PETITION FOR DISCHARGE AND ORDER OF NOTICE THEREON

In the District Court of the United States, for the Southwestern Division, District of North Dakota, in the matter of John Bortell, Bankrupt, No. 4328 in Bankruptcy.

To the Honorable Andrew Miller, Judge of the District Court of the United States for the District of North Dakota, John Bortell, of Burleigh and Stutsman Counties, in said District, respectfully represent that on the 5th day of June, 1923, last past, he was duly adjudged bankrupt under the acts of Congress relating to bankruptcy; that he has duly surrendered all his property and rights of property, and has fully complied with the requirements of said acts and of the orders of the court touching his bankruptcy.

Therefore, he prays that he may be decreed by the court to have a full discharge from all debts provable against him, his estate under said bankruptcy acts, except such debts as are excepted by law from discharge. Dated this 23rd day of June, A. D. 1923.

JOHN BORTELL.

Bankrupt.

ORDER OF NOTICE THEREON

District of North Dakota, ss:

On this 15th day of August, A. D. 1923, on reading the Petition for Discharge of the above-named Bankrupt, is:

BOARD OF ADMINISTRATION, E. G. WANNER, Secretary.

houses, etc. to see that water was boiled, it is understood. The notice issued by Dr. C. E. Stackhouse several weeks ago that water should be boiled still continues.

Doctor Promises Permanent Youth

London, Aug. 22.—The revolution of women, as well as men, and without the aid of the beauty doctor and the dressmaker, has been promised by Dr. Voronoff, the famous monkey gland expert. Dr. Voronoff explained during the recent International Surgical Congress that he was making experiments at the present time, and expected to be able to announce the secret of everlasting girlhood about November.

The announcement that he expected to make grandmothers into debutantes caused a sensation among the delegates, and many of them were frank in saying that they believed it utterly impossible.

In fact some of them said he ought not to do it, one prominent social worker of London declaring:

"What the doctors should do is to find some means of preserving the strength of women of seventy, so that they could give the benefit of their ripe experience to those in need of it."

"Women who have grown old naturally prefer nature to take its own course. There are women who would give anything to have their lost beauty and youth restored, but they are of the selfish type."

Dr. Voronoff refuses to discuss the subject further other than to say he has progressed to the extent that he is certain of success.

CHINESE INFLUENCE

The Chinese influence is apparent in nearly all French designs for fall. Black coats, embroidered in Chinese designs and with Chinese colorings, are being shown in Paris.

STENOGRAPHER WANTED

At once for law office. Apply to John Moses, Hazen, North Dakota. 8-22-1w

Dancing! McKenzie Roof Garden—Tuesdays, Thursdays and Saturdays. 10c dances. Coolest spot in Bismarck.

NOTICE FOR BIDS—PAINTING

Separate bids will be received for painting the exterior metal and wood work of the capitol building; also for painting water tank and tower on credit, and to be paid on credit according to specifications on file with the secretary of the board of administration. All bids must be sealed and presented before noon, August 25, 1923.

JOHN BORTELL.

Bankrupt.

REDS BLOWING HOT ON TRAIL OF M'GRAWMEN

Beat Philadelphia While
Giants Are Being Trimmed
By Philadelphians

By the Associated Press)

Chicago, Aug. 22.—The New York Nationals could feel the Reds' breath coming hot on the backs of their necks as they started on the race toward the world series late yesterday. The world champions lost, 9 to 5, to Pittsburgh, after using four pitchers without effect. The Pittsburgh batsmen took five runs in the first inning and held their lead throughout.

While this was going on in New York the Reds won in Philadelphia by a score of 7 to 5, and climbed up a full game. They now are just three and a half games behind the leading leaders.

In Boston the St. Louis Nationals lucked it against Cooney in the sixth and Oescher in the ninth, defeating the New Englanders, 8 to 2. Hornsby made a pair of two-baggers.

The Robins lost again in Brooklyn when the Chicago Nationals landed hard on Dazzy Vance's delivery. Dazzy was exceedingly good in spots, striking out nine men but the Chicago swatters seemed to find him often. Dutch Henry, who pitched the ninth inning, let in five runs.

The Chicago-New York and the St. Louis-Washington games were prevented by rain.

Rain prevented all scheduled games in the American League.

WRESTLER IS READY FOR FALL BOUTS

Stanley Rodgers, Bismarck light heavyweight wrestler, is taking a vacation at Bemidji, Minnesota, he writes The Tribune. He is training every day, he says, and when he comes back to Bismarck about the 25th he expects to be in fine shape for his fall wrestling campaign.

Clarence Abrahamson of Kathryn, N. D. also writes The Tribune, saying that he has just returned from a trip through southern Minnesota where he met George Halverson, Grappling Brown and James Grattan, winning all three wrestling matches.

Abrahamson wants a match with Thor Jenson, local middleweight wrestler. Abrahamson says he chins the bar thirty times each morning for a little exercise.

Theatres Feature Feminine Pugilists

Berlin, Aug. 22.—"Lady boxers" are star attractions at the cheaper variety houses in Berlin, and attract many tourists to these places of amusement. There are several groups of women pugilists which spar in various cabarets and music-halls, and they box with great vigor.

One of the best-known female boxers has a nose which is badly deformed from having been broken, and another has a cauliflower ear.

Most of the female pugilists are young and extremely active. They are about as scientific as many of the men who pose as professional boxers, for the art of boxing is not highly developed in Germany.

TEAM'S IN CELLAR BUT HE ISN'T DOWN-HEARTED

Fletcher Blames Poor Fielding, and That Only, For Phillies Poor Showing This Year

By BILLY EVANS.

Philadelphia, Aug. 22.—Few managers are encouraged with a seventh place ball club, but Arthur Fletcher of the Philadelphia Nationals is an exception.

From the low position of the Phillies one gets a picture of a disorganized, dissatisfied collection of ball players. But quite the contrary is the condition in Art Fletcher's family, and Fletch, at present is seeing daylight for the first time in his managerial career.

The main difficulty with the Phillies, in Fletcher's opinion, has not been weak pitching as has been reported by the judges of the press box. Far from that. It has been a weak defense on the left side of the infield.

In the first place, it must not be forgotten that Fletcher had to piece together his infield from a rather motley collection. He has Walter Holke, last year with Boston, at first; started with Parkinson and now has Cotton Tierney, formerly with the Pirates, at second; Heine Sand, last season with Salt Lake, is at short, and third base has been turned over to Wrightson.

Weak Defense Fatal.

Up until this season these four had never played together before.

"We may look bad where we are," remarked Fletcher the other day, "but don't judge everybody by their looks—particularly this ball club."

"Not exaggerating, I know of at least 15 games that were lost through weak fielding around the left side of the infield—games, let me tell you, that we had won and were lost by the one field slip."

"We had the Giants beaten in six games this season closing the seventh inning, and lost them down the stretch. Figures will support my talk. Can't beat that for rough luck—chipping the world champions right down to the stretch and then losing."

DAVIS TENNIS TEAM CHOSEN

New York, Aug. 22.—The American team that will defend the Davis cup, international team tennis trophy, will be composed of E. Norris Williams, II, of Philadelphia, captain; William T. Tilden, II, of Philadelphia, national champion; William M. Johnston, of San Francisco, world's champion, and Vincent Richards of Yonkers, N. Y.

This team, which will oppose Australia, survivor of the 1923 preliminary play, in the challenge round at Forest Hills, N. Y., August 31, September 1 and 3, is the same as that which successfully defended the historic trophy against the anti-podeans last year. The selection was made late yesterday by the Davis cup committee of the United States Lawn Tennis Association of which Julian S. Myrick, of New York, is chairman.

Readers Want Adventure Stories

Chicago, Aug. 22.—The summer-time reader would rather have a true account of pirates or shooting seas in the Arctic than even a love story, declares Nathan E. Levin, assistant librarian of the Chicago Public Library, who has been studying the tastes of the general reader for years.

"That does not mean that the love story has become unfashionable," Mr. Levin added. "It means rather that at vacation time everybody temporarily forgets his desire to get on in his own business or personal affairs and prefers to read about cinnamon-colored savages of the South Seas or trapping wombats in the winds of Australia."

WOOD SHADeS.
The wood shades, flame and blane metallic hues will be used in evening gowns this fall.

Fights Injunction

Puzzling Plays

By BILLY EVANS

THE PLAY

A few years ago two unusual plays came up on the Detroit American League grounds.

Ground rules were in vogue. An overflow crowd caused ropes to be stretched in front of the right field bleachers. Balls hit into such territory were good for two bases.

In one game a hard hit line drive struck in front of the roped territory, bounded over the heads of the spectators back of the ropes and went into the bleachers, without coming in contact with any person or thing or restricted territory.

Later, a batsman hit a fly ball which struck in the territory back of the ropes. It then bounded into the bleachers. Both plays appeared identical, yet different rulings were rendered in each case. The second hit was the longer.

What would have been the proper ruling?

THE INTERPRETATION

In the first play the proper ruling would have been to allow the batsman a home run, which the umpire did. The ball struck in playing territory in front of the ropes and then bounded over the crowd into the bleachers, making such a hit a home run.

In the other the batsman was granted two bases as covered by the ground rules, even though the hit was a longer drive than the other one.

In the second case the ball struck the ground back of the ropes, in territory restricted to two bases. The moment it struck the ground it became a two-base hit, regardless of what happened later.

The ball immediately became dead when it hit air and the fact that it then bounded into the bleachers meant nothing.

Scientist Comes Home Ladened With Museum Riches

Chicago, Aug. 22.—Four expeditions of scientists in the service of science, who have been exploring uncharted wildernesses in several parts of the world, are expected to return soon to their home institution here. The Field Museum of Natural History. The Museum has seven parties in the fields at present.

Dr. E. S. Biggs is penetrating the unknown interior of Argentina, in search of prehistoric animals, declared by scientists to be a most perilous task. The investigator has to face hostile tribes, irresponsible workmen and the danger of climbing precipitous cliffs in search of specimens. Sometimes, he must employ a small army to bring back his finds.

Dr. Berthold Laufer, curator of the department of anthropology, is penetrating southern China in an effort to discover the century-old secrets of that land. He will make a study of the language and culture of strange aboriginal tribes said to have lived in China long before the Chinese came.

Dr. O. C. Farrington and a party are studying the diamond mines of Brazil. Dr. F. C. Cole is in Java, where he has been studying the customs and culture of the people. Contrary to the usual lot of the explorer, Dr. Cole is said by the curators to have been able to travel into the island's fastnesses by automobile with the greatest ease.

Dr. J. Allen Mason is in Colombia, where he has been studying the ancient civilization of that land, thought to have been destroyed centuries before the coming of the Spaniards. Another party is headed by Dr. W. H. Osgood, who will return soon from Peru and Chile, where he has been collecting rare tropical birds.

EMBROIDERIES.

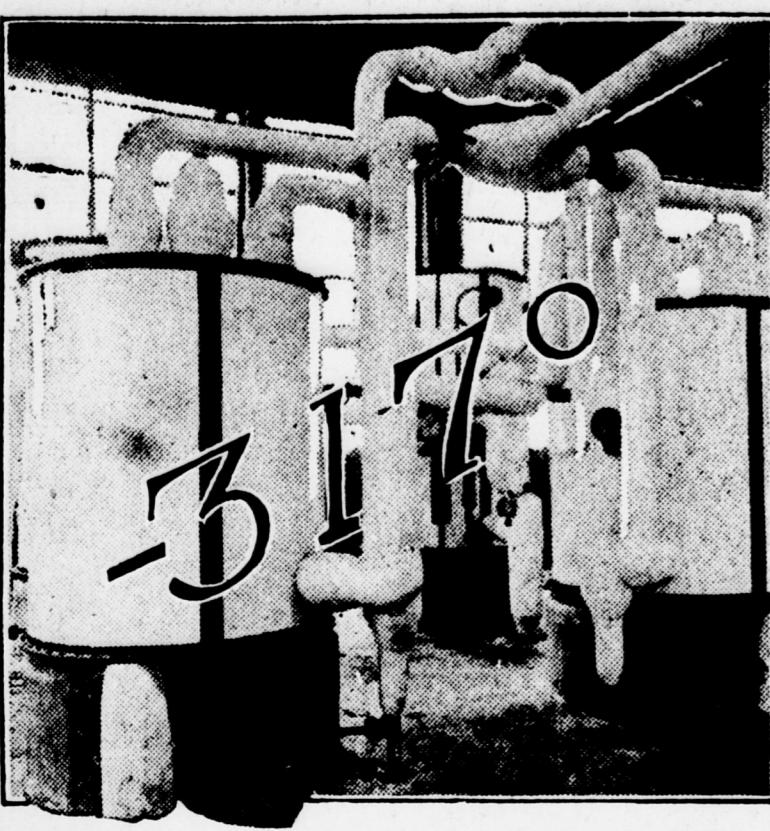

Interesting embroideries executed in ribbon are seen on many of the fall frocks. One frock shows the low waist line emphasized by a belt made of fold upon fold of satin-edged gros-grain ribbon alternated with ribbon which had a gold edge.

Railroad fare, automobile sight-seeing trips, all accommodations and meals included, but not Pullman fare and meals on dining cars.

A Wonderful Vacation for You and Your Family.

COLDEST ROOM IN THE WORLD

WHERE TEMPERATURE IS 317 DEGREES BELOW ZERO.

By NEA Service

Fort Worth, Tex., Aug. 22.—Fort Worth folks have as much hot weather complaint as any other town's citizens—yet right here in the coldest spot on earth!

Furthermore, it stays that way at a temperature of 317 below zero. That's right, 317 below.

The government's helium plant is the scene of this extreme coolness. Natural gas is liquefied at this temperature, so the helium can be extracted for use in the army and navy dirigibles.

Special safeguards are maintained to keep these rooms insulated from the rest of the plant. There's a reason. Lieutenant R. E. Davenport, in charge, gives some.

If a person would just put his hand in that temperature, he'd have to put it in one second freeze so solidly that it would drop off.

"Put a fresh piece of beefsteak in

there and then drop it to the floor. It would break into a thousand pieces, flying in all directions.

"A lead pencil would do the same. Steel pipes, when subjected to but part of this temperature, shrink so quickly that all paint drops from them. A human body would also become so brittle it would fall to pieces."

Helium, which is extracted from the liquefied gas, is non-inflammable, and possesses 92 per cent of the buoyancy of hydrogen. Its use in dirigible airships will make them immune from the explosion disasters of the last few years.

After helium is extracted, the gas goes back into the city mains, as good as ever for cooking the family dinner.

Meantime, Fort Worth folks choose to shelter under the August sun, rather than frequent the city's cool-est spot.

LAWYERS OF STATE MEET ON THURSDAY

Code of Professional Ethics Will Be Adopted At Session

Devils Lake, Aug. 22.—The State Bar association will hold its annual meeting in Devils Lake next Thursday and Friday, with headquarters in the Civic and Commerce association rooms.

Between seventy-five and 125 delegates are expected to attend. The North Dakota State Bar association is unique in that it is the only Bar association in the United States to be incorporated by law. Its membership includes all licensed attorneys within the state paying fees.

By far the most important business of the meeting will be the adoption of a code of professional ethics to be used by the barristers of the state.

The program follows:

10 a. m., Thursday August 23rd. The convention opens in the Civic and Commerce rooms. Judge C. J. Fiske presiding.

Prayer.

Address of welcome, Mayor A. V. Haig.

Response by Judge Fiske.

Reports of the secretary, the treasurer, the president and the committee.

General Business, including the adoption of a "Code of professional ethics."

2 p. m.: The Judge Alfred Wallin memorial services.

Address by Judge M. McKenna, "American Law Institute."

Address by Aubrey Lawrence, Esq., "A Writ of Assistance."

Address by Judge A. E. Burr, "The Mexican Situation."

Address by E. F. Flynn, Esq., "Railroad Rates Valuation."

August 24th, 10 a. m. President's annual address.

Address by Thomas H. Pugh.

Address by C. J. Young, Esq., "Some Insistent Challenges."

Business session. Election of officers.

4:00 p. m.—Public address in the Grand Opera house, "Who's Running the Country," Hon. Martin J. Wade.

8:00 p. m.—Annual banquet at the Grayson with Judge Fiske presiding as toastmaster.

The toasts are as follows:

John Burke, in response to the toast, "Coming Back."

Tracy Bangs, in response to the toast, "Dangers of Legislation, the Terrifying Period, Liberty Imperiled."

N. R. Craig, in response to a toast, Judge Martin Wade, in response to a toast.

PRESIDENT IN WHITE HOUSE

"GOLD STAR" MOTHERS MEET IN KANSAS

Select Mothers by Number of Sons or Daughters Lost in Service

SAUNDERS SUED

Memphis, Tenn., Aug. 22.—The Piggy Wiggly Corporation filed a bill in U. S. District Court here today demanding of Clarence Saunders, former president of the corporation, personally and as head of the Piggy Wiggly Investment company an accounting of Class A stocks sold through the investment company and seeking an injunction to restrain Saunders from disposing of any money or notes received from such sale.

BODIES FOUND

St. Paul, Aug. 22.—Four more bodies of the victims of the tragedy on the Mississippi river here Sunday night when their launch struck a submerged log and sank immediately, were recovered today, leaving three bodies unlocated. Two bodies were recovered yesterday while one was found a short time after the accident. None of the bodies found yesterday had been identified this morning.

Twenty-three governors have already replied," Mrs. Boone stated.

"Most have promised aid, although some of them declare selection to be a delicate task."

Mrs. Boone said that the War Mothers have decided that the extent of a mother's sacrifice, by virtue of which she should be selected, would be gauged by the number of sons or daughters who died in the service of their country in the World War.

"This might not prove a strictly accurate basis for judgment," Mrs. Boone declared, "but it is the best we could devise." Mrs. Boone lost a son in the war.

The delegates sent by the states, Mrs. Boone asserted, will be the guests here of the Kansas City chapter of War Mothers.

Among the military men of prominence who have been invited to attend the convention are General John Pershing and Admiral R. E. Coontz, chief of operations of the United States navy.

Mrs. R. E. Bigney, of White Plains, N. Y., national War Mother, will address the convention.

Among other incidents in the program now in progress of formation will be the dedication to Jackson County, Missouri, men who died in the war, of a huge granite boulder which will be set down amid the trees of Missouri's first "memory mile," near Kansas City.

The Good MAXWELL

Family Takes Up Residence After Mrs. Harding Leaves

Washington, Aug. 22.—President and Mrs. Coolidge are spending their first day as residents of the White House.

Yesterday they slipped into the White House almost unnoticed. Only a chance group of tourists visiting the grounds and a few photographers were on hand to witness the formal taking up of residence there by the thirtieth president.

A few days before Mrs. Harding had finished the task of removing the personal belongings of President Harding and herself and left to stay a short time with friends here.

RATE SLASHED FOR TRIP TO YELLOWSTONE

Northern Pacific Railroad Announces Special Excursion Trip to Park

Slashing the rate for a trip through Yellowstone Park, the Northern Pacific Railway today offered Bismarck a bargain sale in vacation offerings—a North Dakota Labor Day excursion through Yellowstone!

The surprising cut in both railroad and Park accommodation rates is planned as a means of getting the people of this city acquainted with the wonders of Yellowstone so that they will join in boosting the Park and bringing tourists into the Northwest to see it in years to come.

"Not enough citizens of the Northwest who live comparatively near to Yellowstone really know the Park," said Mr. McDonald, local representative of the Northern Pacific in announcing the Labor Day excursion." This summer there have been people from all over the world at Yellowstone, but not enough from the Park's own neighborhood.

All-Expense Rate Is Low

"That is why the hotels and camps have joined us in cutting Park rates so for this special Labor Day the complete trip from Bismarck to Yellowstone and return, with four and one-half days in the Park, will cost only \$65.00. If you stay at the camps, instead of the hotels it will cost even less, only \$59.50. This covers the complete cost of the tour with the exception of meals and Pullman on the train.

"The Labor Day excursion should mean a wonderful outing for great many people from your city—some of them will never be able to forget. Everyone knows that September is the best time of year to see the Park. I think the cut in rates will mean a large increase in the number of people in the Northwest who prize Yellowstone Park as a priceless possession. Everyone who goes on the tour will later help in spreading the story about this wonderland of geysers, bears, mountains, lakes and canyons."

SAUNDERS SUED

Memphis, Tenn., Aug. 22.—The Piggy Wiggly Corporation filed a bill in U. S. District Court here today demanding of Clarence Saunders, former president of the corporation, personally and as head of the Piggy Wiggly Investment company an accounting of Class A stocks sold through the investment company and seeking an injunction to restrain Saunders from disposing of any money or notes received from such sale.

Two bodies were recovered yesterday while one was found a short time after the accident. None of the bodies found yesterday had been identified this morning.

Devils Lake, Aug. 22.—Paul Belt, of Towner county pleaded guilty to grand larceny before Judge Butt and was sentenced to one year in the state penitentiary at Bismarck.

It was Belt's second offense on the same charge, he having served a short term last year in the Towner county jail.

He was arrested on the charge of

stealing robes, coats and various other articles from cars left standing outside a dance pavilion in the vicinity of Rock Lake.

U. S. SHIP SINKS IN GULF

U. S. S. Gopher of Ninth Naval Reserve Goes Down During Gale

Washington, Aug. 22.—The U. S. S. Gopher, a training ship attached to the ninth naval reserve district, was sunk in the Gulf of St. Lawrence during a gale, according to a message received by the navy department, which said there was no loss of life.

The ship went down in 36 fathoms in the heart of the Tennessee mountains there is a school—the Du Bois Memorial School—where the students argue over the Pauline psychology while they sew buttons on their overalls; where a man chants Latin verbs to the swish of his broom, and the engineer at the sawmill talks classic Greek with his fellow workers.

Out in the truck garden cabbages are cultivated amid discussions of second century heresies, and fundamentalism versus modernism is threshed out over the milking of the cows. In one day these students buried the baby of a broken hearted mother, having first made the coffin, wrote Greek exercises, mended a wagon, and wound up by playing a winning game of baseball.

The school is an unique institution where men, long since past school age, but wishing to fit themselves for clerical orders, are trained for the ministry. They are poor men who come to this school, which is named after an Episcopal divine. There are two ex-sailors among them, one or two with army experience, some clerks, mechanics and farmers.

The school is co-operative. There are no tuition fees, and every one of the students works at some occupation about the farm and industrial plant for his keep and training. Rev. W. C. Clifton, Dickinson, Dunn Center, Ellendale, Fessenden, Grand Forks, Jamestown, Larimore, Lisbon, Minot, Napoleon, Pembina, Williston.

Orris W. Roberts, Meteorologist.

COLUMBUS, Aug. 22.—Ohio naval

reservist officers here declared last night the U. S. S. Gopher was not on a cruise when she sank. She was being towed from Montreal to the Boston navy yards, officered and manned by regular navy officers, they said, and no Ohio naval reservists were abroad. The boat was being towed to the yards, because she was no longer suitable for salt water cruising, since she had not

sufficient fresh water tanks.

The school is co-operative.

The boat was being towed to the yards, because she was no longer suitable for salt water cruising, since she had not

sufficient fresh water tanks.

The school is co-operative.

There are no hard and fast rules except that of co-operation. Perhaps never was a more uncertain adventure more well-foreshadowed than this.

The school is co-operative. There are no tuition fees, and every one of the students works at some occupation about the farm and industrial plant for his keep and training. Rev. W. C. Clifton, Dickinson, Dunn Center, Ellendale, Fessenden, Grand Forks, Jamestown, Larimore, Lisbon, Minot, Napoleon, Pembina, Williston.

Orris W. Roberts, Meteorologist.

COLUMBUS, Aug. 22.—Ohio naval

reservist officers here declared last night the U. S. S. Gopher was not on a cruise when she sank. She was being towed from Montreal to the Boston navy yards, officered and manned by regular navy officers, they said, and no Ohio naval reservists were abroad. The boat was being towed to the yards, because she was no longer suitable for salt water cruising, since she had not

sufficient fresh water tanks.

The school is co-operative.
